

# PURE PEDICURE

PIPELESS™ REFLEXOLOGY  
BATH COLLECTION

**SANIJET®**  
PIPELESS HYDROTHERAPY

# PURE CONTOUR

SANIJET's Pipeless™ Reflexology Pedicure Baths stimulate key points on the feet to release tension, restore balance, and improve energy flow and wellness. Inspired by natural stone foot paths in Asia, our newest designs are perfectly arched to contour the feet, for a pure, clean and safe experience.

## PURE...THERAPY

SANIJET's Pipeless™ Reflexology Pedicure Bath Collection delivers the therapeutic benefits of reflexology and is ideal for treatments using additives, such as bath salts and essential oils.

Featuring five stunning models, this innovative Collection sets a new standard for custom pedicure banquettes, providing spas and salons added design freedom. Available in today's popular colors (White, Biscuit, Almond and Black), the collection includes additional amenities such as reflexology-inspired stone design basins, relaxing chromatherapy lighting, padded foot rest with Ultrafabrics™ resistant synthetic leather, safe and quiet Pipeless™ hydrotherapy jets, and an easy to operate control panel.

## ...PREFERENCE

Pure, clean and quiet, SANIJET Pipeless™ Reflexology Pedicure Baths offer authentic hydrotherapy – the way bathing was meant to be. For this reason, leading spas like The Spa at Mandarin Oriental, Canyon Ranch SpaClub at the Venetian, The Spa at Red Rock, The Spa at The Hotel Hershey, The Ritz-Carlton Spa Grande Lakes, and The Spa Coeur d'Alene choose SANIJET.

## ...SILENCE

With Pipeless™ technology, peace and quiet is the standard. In fact, Pipeless™ baths make only half the noise of a typical piped system, providing your clients a soothing, relaxing spa experience.

## ...PIPELESS

SANIJET's revolutionary Pipeless™ design gives you unmatched hydrotherapy and the assurance of clean, pure water with every treatment. With Pipeless™ technology there are no hidden pipes, pumps or fittings to retain dirty pedicure water and residue, providing a breeding ground for harmful bacteria.

Each jet is self-contained and installs directly into the basin wall. Driven by a quiet and efficient motor, the jet draws water in, then propels it out to create an invigorating hydrotherapy experience.

## ...DISINFECTION

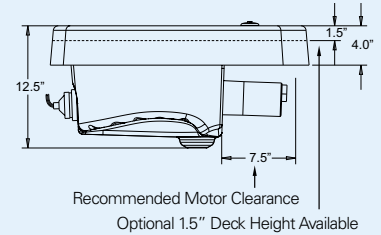

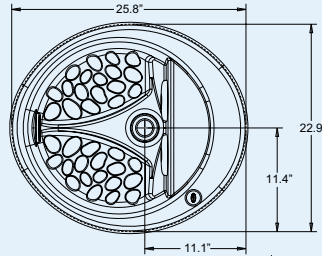

Only SANIJET's unique Pipeless™ technology meets the demanding disinfection requirements of NSF International - Protocol P182. In approximately five minutes, SANIJET's Pipeless™ Reflexology Baths can be thoroughly cleaned to hospital-grade standards with our simple, effective disinfection protocol.
