

SWASANA

CARY COLLIER
COLLECTION

BATHING IN MOONLIGHT

The Swasana was designed by Cary Collier for SANIJET and was inspired by the exotic beauty of Bali. The calm of the Bali moon over the water is summoned by the Swasana's innovative Moon Glow lighting. The terraced rice fields of Bali are reflected in the levels of falling water. The SANIJET Pipeless™ hydrotherapy system completes the pure, safe, quietly serene environment. "Waterfalls, sacred springs, the role of water in ceremonies," observes Collier, "they embody the memories I have of Bali and provide the inspiration for this design." Nothing expresses the essence of this spa better than the Balinese meaning of the name "Swasana," perfect splendor.

Like every SANIJET whirlpool bath, the Swasana offers the purity of SANIJET Pipeless technology. This patented system ensures hospital-grade disinfection and eliminates the risks posed by traditional piped and air whirlpool bath systems that trap and foster the growth of harmful bacteria.

"I want people to feel they have entered a special place with a sense of pleasant mystery that lies just around the next corner or with the next treatment, whether in a spa environment or within the comfort of their homes."

– CARY COLLIER

Spa designer Cary Collier is a leading pioneer of the spa industry and has designed more than 120 spas in 20 countries. He is renowned for the serene, relaxing environments he creates by artfully blending spa settings with natural environments.

SWASANA PIPELESS™ WHIRLPOOL BATH FEATURES

- The two-person, Balinese-inspired design of the Swasana creates a distinctive environment for a couple's treatment room or can provide the ultimate centerpiece for a luxurious residential installation.
- SANIJET Pipeless technology ensures hospital-grade disinfection and eliminates the risks posed by traditional piped and air whirlpool bath systems.
- Designed to accommodate self-rimming or undermount installations.
- The Moon Glow Fiber Optic Lighting System, inspired by the beautiful moon over Bali, can create an invigorating spectrum of vibrant colors or a calming glow in a single shade (optional with upgrade).
- Twin Waterfall Spouts send cascades flowing into the channel and overflowing into the bathing vessel (optional with upgrade).
- The Wellspring™ water filtration system eliminates chlorine and other impurities to create the essence of bathing in pure spring water – which is better for the skin and greatly enhances the effectiveness of products used during bathing treatments (optional with upgrade).
