FEATURES FOR ITEM: C91775

This Dual Thermostat Warming Cabi has two compartments with dual controls that hold approximately 48 wash cloths. Each compartment has a single wire rack, and the doors open to the right and feature magnetic latches. The upper compartment temperature ranges between 159-172 degrees Fahrenheit. The lower compartment temperature ranges between 127-156 degrees Fahrenheit. Drip tray included.

Not only is this Cabi used for warming towels, wash cloths, and facial towels, but its lower compartment maintains ideal temperatures for warming Eco-fin™ cubes with the plastic liners and sleeve without melting the plastic while the upper compartment maintains higher temperatures to keep a perfect warmth for herbal mitts, booties, neck wraps, and more.
