

TWEEZERMAN Professional

TWEEZERS

Ingrown Hair/Splintertweeze

ITEM CODE: 1300-P

Description

Amazingly precise hand-finished points for removing ingrown hairs and anything embedded under the skin including splinters, thorns, glass and hair splinters. Also excellent for nail art. Polished Stainless Steel.

Feature	Benefit
Stainless steel	Durable, easy to clean
Hand filed perfectly aligned tips	To grab every hair every time
Tapered point	Great for precision work, including removing stubble, ultra-fine hairs , ingrown hairs and splinters
Perfectly calibrated tension	Comfort & control

Product Usage

To remove an object embedded in skin use the points of the tweezer to isolate and grab the object. To remove ingrown hair use one tip of the tweezers to 'spring out' the hair. Tweeze gently in direction of hair growth. To increase spring tension, gently pull the two halves of the tweezer slightly apart. Once you have increased the tension, you cannot decrease it. Clean tips after each use.

Tips & Tricks

Caution: Disinfect tips of tweezer prior to any work under the skin. Disinfect skin area before and after use

Works Great With

Tweezermate
Deluxe Shaving Brush
Grooming Tweezer
