

Polymer name: Rigid PET Films

1. Substance/Preparation and Company Identification

Polymer: Rigid Polyester (APET, PETG, GPETG, GRG) films

Company name: Klöckner Pentaplast of America, Inc.

3585 Klöckner Road, P.O. Box 500

Gordonsville, VA 22942

USA

Information about Phone: +1.540.832.3600

material/preparation: (identical with emergency information)

2. Composition/Information on Ingredients

Chemical description: Amorphous Polyester, Copolyester

Dangerous components: None

3. Hazard Identification

Not applicable

4. Emergency and First Aid Procedures (only necessary when handled without care)

Inhalation: If Polyester decomposes due to overheating or in contact with fire,

remove effected persons to fresh air. In case of irritation of respiratory system or if feeling unwell after prolonged exposure, seek medical

attention.

Skin contact: If contact with hot (melt) product occurs, wash with plenty of water.

Treat as for a thermal burn.

Eye contact: After contact with hot (melt) product, immediately flush eyes with

water for at least several minutes. Seek medical attention.

Ingestion: To avoid irritation, seek medical advice.

Advice for the doctor: After inhalation of decomposed products, treat symptoms

(decontamination, vital functions). If necessary, take action against

irritation of the mucous membranes with HCl.

The statements contained herein are for informational purposes only and are true and accurate to the best of our scientific and technical knowledge. This information does not constitute a guarantee or warranty, express or implied, nor does it establish a legally valid contractual relationship. It is the customer's responsibility to determine the suitability of this product for the customer's intended use, and Klöckner Pentaplast does not assume any liability for the customer's use of this product or the information contained herein. Revision: 3/2010

5. **Fire Fighting Procedures** 

Suitable extinguishing

Water spray, powder, carbon dioxide

media:

Unsuitable extinguishing

media:

Burning may release: Carbon Dioxide (CO<sub>2</sub>) Water vapour (H<sub>2</sub>O)

Carbon Monoxide (CO)

Aldehydes **Alcohols** 

None

If the burning material cannot get enough air, release of carbon monoxide, soot, and other gases and vapours is possible.

Special protective

equipment:

If necessary, use air-bottled or air circulating apparatus and protective clothing for fire fighters to prevent contact with skin and

Further information: Observe local regulations when contaminated water and burning

waste are removed.

6. Spill or Leak Procedures

> Personal precautions: Not applicable Environmental precautions: Not applicable

Methods of cleaning: Pick up by mechanical means for disposal or reuse

7. **Handling and Storage Precautions** 

> Handling: Avoid overheating the material, it decomposes to gaseous

> > components (see also 5.). Thermal degradation does not occur at low

temperatures, but becomes faster at higher temperatures.

Decomposition: >150°C (long-term contact)

>200°C (short-term contact/i.e., warm forming)

It is advisable to install low exhaust ventilation in the vicinity of processing machines in all areas where melt or high-temperature

processing is carried out.

Fire and Explosion

Protection:

Take precautionary measures against static discharge (i.e., using proper grounding techniques) when handling rolls or sheets in dry

rooms (especially to avoid harm to people)

Storage: Take precautionary measures to avoid fire hazard. Store in normal

room conditions without direct exposure to sunlight.

The statements contained herein are for informational purposes only and are true and accurate to the best of our scientific and technical knowledge. This information does not roles alternants contained neterinare for information appropriate so may and are true and accordance to the best of our section of section the continue and recommendation of the constitute a guarantee or warranty, express or implied, nor does it establish a legality valid contractual relationship. It is the customer's responsibility to determine the suitability of this product for the customer's intended use, and Klöckner Pentaplast does not assume any liability for the customer's use of this product or the information contained herein. Revision: 3/2010

**Exposure Control/Personal Protection** 8.

Additional advice for design

See item 7

of machines:

Components with limits to be observed (depending upon work station):

PET is recognized as safe.

Given the special precautions mentioned under "7. Handling," these

traces present no toxic risk to the processing personnel.

Protection: Gloves should be worn when handling hot material. Safety glasses

are normally recommended for all industrial workplaces when

handling hot material.

9. **Physical and Chemical Properties** 

> Form: Mono films

Color: From clear to black as required

Smell: Odorless under normal conditions, melt material has a specific odor

know as "plastic."

Change of state: Softening temperature (DIN EN ISO 306): 60-90°C

Glass transition temperature: approx 80°C

Ignition temperature: N/A

Density (DIN EN ISO 1183-2): 1,25-1,35 g/cm<sup>3</sup>

Solubility of PET: Not soluble in: water

Fire supporting properties: Polyester products are not easily combustible.

Stability and Reactivity 10.

> Conditions to avoid: Thermal degradation by overheating (see 7.)

Information about Toxicity 11.

> Polyester is recognized as safe and biologically inert.

Klöckner Pentaplast certifies that its rigid film and sheet product complies with the most recent package requirements for heavy metals of the Toxic Packaging Clearing House (TPCH, formerly

CONEG) legislation and the latest March 9, 2005, requirements of the European Packaging Directive EU 94/62, as well as European

Union Directive 2002/95/EC.

12. **Ecological Information** 

> Polyester is not soluble in water (WKG 0, by supplier self declaration); Polyester is harmless in contacts with fish and bacteria. In a water treatement plant, Polyester can be separated mechanically.

The statements contained herein are for informational purposes only and are true and accurate to the best of our scientific and technical knowledge. Revision: 3/2010

#### 13. Disposal Considerations

Klöckner Pentaplast guarantees the recycling of customers' material (=100% kp material). Recycling of printed or other used material is also possible, but this depends on the degree of impurities.

Uncontaminated material is normally used as material for recycling, but can also be treated as household or incineration waste in accordance with local regulations.

European Waste-Catalogue: 75/442/EEC: 200103 and 20016.

Klöckner Pentaplast certifies that its rigid film and sheet product complies to the European Packaging Directive EU 94/62, as well as its amendments.

### 14. Transport

No hazardous material according to transport regulations (ADR, RID, ADNR, IMDG, IATA).

### 15. Regulatory Information

EEC labelling acc. 67/548/EEC:

Not applicable

National legislation acc. to

Not applicable

§ 4a GefStoffV:

### 16. Further Information

Klöckner Pentaplast rigid films and sheet products do not contain any Ozone depleting substances, including those listed in the 1990 Clean Air Act Amendments.

The information and recommendations contained herein are based upon present data believed to be correct. However, no guarantee or warranty of any kind expressed or implied is made with respect to the information contained herein.
