4. FIRST-AID TREATMENT

Skin contact: In case of irritation, apply an emollient cream or after wax tea tree oil.
DO NOT APPLY IF PRODUCT IS VERY HOT. If burns occur, flush with water.
If serious burns occur such as blistering contact emergency services (911).

5. FIRE-FIGHTING MEASURES

In case of fire use dry chemical CO2 or foam extinguisher.
Spillage: Allow to cool, then lift or scrape off.

6. ACCIDENTAL RELEASE MEASURES

DO NOT OVER HEAT. Heat the wax in a wax warmer until the wax is liquefied and apply at a low temperature. If overheated product will become smoky. Turn off heat source, allow room to ventilate.
DO NOT APPLY on skin when very hot. Product will be safe to use when cooled down.

7. HANDLING AND STORAGE

Heat the wax in a wax warmer until the wax is liquefied and apply with a spatula at low temperature. Clean tools, equipment, counters with wax cleaner, oil or alcohol.
Store product in cool area.

8. EXPOSURE CONTROLS

For professional use only. Heat product at lukewarm temperature. Must be completely melted and viscous. Optimal temperature 160°F -165°F. Test inside of wrist for comfort. Do not apply on skin if product is very liquid or smoky. Product can cause serious burns if temperature exceeds 200°F).

9. PHYSICAL DATA & PROPRIETIES

Appearance: *Clear viscous liquid.* Odor: Faint balsamic.

Flash point: Minimum 392° F/200° C

10. STABILITY & REACTIVITY

Do not apply on irritated or broken skin, acne, moles, sunburned or varicose veins.

Do not apply on skin treated with Retin A, Accutane, steroids, glycolic acid or alpha hydroxyl products.

11. TOXICOLOGICAL INFORMATION

Non-toxic. For topical use only. Redness of skin may occur. Apply lotion or tea tree oil.

If redness continues after 48 hours consult medical advisor.

If allergic reaction occurs consult a doctor.
