5.1 Fire & Explosion Hazards: DANGER! HIGHLY FLAMMABLE LIQUID AND VAPOR! Keep away from heat, lit cigarettes,	
sparks & open flame. Keep container closed.	•
5.2 Extinguishing Methods: CO ₂ , Halon (if permitted), Dry Chemical, Foam, as authorized.	4
5.3 Firefighting Procedures: This product is a Class IB flammable liquid. When involved in a fire, this product will ignite readily	
and decompose to produce carbon oxides. Vapors of this product are heavier than air and may travel to a source of ignition and flash back to a leaking or open container.	
First responders should wear eye protection. Structural firefighters must wear SCBAs and full	\ /
protective equipment. Use a water spray or fog to reduce or direct vapors. Water may not be	~
effective in actually extinguishing a fire involving this product.	
6. ACCIDENTAL RELEASE MEASURES	
Before cleaning any spill or leak, individuals involved in spill cleanup must wear appropriate Perso Equipment. For small spills (e.g., < 1 gallon (3.8 L)) wear appropriate personal protective equipment (e.g., gog	oggles, gloves).
Maximize ventilation (open doors and windows) and secure all sources of ignition. Remove spilled absorbent material and place into appropriate closed container(s) for disposal. Dispose of properly in account of local, state and federal regulations. Wash all affected areas and outside of container with plenty of was soap. Remove any contaminated clothing and wash thoroughly before reuse.	ccordance with varm water and
For <u>large spills</u> (e.g., ≥ 1 gallon (3.8 L)), deny entry to all unprotected individuals. Dike and contain material (e.g., sand or earth). Use ONLY non-sparking tools for recovery and cleanup. Transfer liquid to recovery or disposal and solid diking material to separate containers for proper disposal. Remove contampromptly and wash affected skin areas with soap and water. Keep spills and cleaning runoffs out of muland open bodies of water.	o containers for minated clothing
