

Ultracare Disinfectant Concentrate

Surfaces:

Use ¼ ounce Ultracare Disinfectant Cleaner concentrate in Ultracare Spray Bottle (pint capacity) and fill with water.

Implements:

Use ½ ounce of Ultracare Disinfectant Cleaner concentrate in a glass jar (quart capacity) and fill with water.

If using an Ultracare Organizer Tray System use ¾ ounce cleaner and fill with water. Place implements in tray and lower into solution.

Dilution:

Mix 2 oz. of the solution per gallon (liter) of water. Thoroughly pre-clean implements and completely immerse brushes, combs, scissors, tweezers, manicure implements, and other tools for 10 minutes or as required by local authorities. Fresh solution should be prepared daily or more often when the solution becomes diluted or soiled.

NOTE:

Plastics may remain immersed until ready to use. Stainless steel implements must be removed after 10 minutes, rinsed, dried and kept in a clean non-contaminated receptacle. *Prolonged soaking may cause damage to metal instruments.*
