

## Lip Softener™

1/2 oz. clear jar

**INSPIRATION:** The world needs a 100% clean (chemical free), 100% effective, treatment balm that tastes good, looks good, feels good, is good... introducing *Lip Softener!* Calendula is powerful in this formula and serves to strengthen and heal the delicate tissue of the mouth. Used regularly, it will prevent cracks and discomforts of dry, exposed lips. It is a velvety softener to ward off fine lines and creases that begin to appear with age. It is an excellent treatment before and after exposure to dry heat or severe weather conditions. The iron oxide and mica add a hint of healthy color. Mint refreshes and cools the mouth. And the vitamin C, they say, can actually serve to plump the lips.

**INGREDIENTS:** sweet almond oil, calendula extract, vitamin e, beeswax, peppermint essential oil, orange wax, grapefruit essential oil, iron oxide and mica

Sweet Almond Oil	A light, odorless, high-grade fruit kernel oil - wonderfully nourishing to the skin.
Calendula Extract	A heady, resinous flower from the marigold family. Calendula one of the most powerful of all the skin-repairing herbs or flowers. It is used to promote fast healing of wounds, scars or burns, including those produced by laser surgery.
Vitamin E	Used to stabilize all of Farmaesthetics natural non-aqueous formulations. Benefits in restoring skin's elasticity. Assists in healing scars and preventing stretch marks in skin that is being stretched from pregnancy or weight gain.
Beeswax	Beeswax is a completely mysterious ingredient. It is a perfect natural preservative when used in herbal preparations such as salves and balms and has been used for centuries as an integral component of skincare and cosmetic formulations. Beeswax contains its own antibacterial agents that work with the other complex constituents of the wax, to speed healing of the skin. It is also a perfect protectant, sealing in moisture while binding active herbal ingredients to the skin, so as to maximize the herb's healing benefits.
Peppermint Essential Oil	Cools the skin. Relieves the discomforts of heat rash. Reduces the itch and sting of insect bites. The menthol in the leaf and oil provides a sense of relief and refreshment to most skin irritations, as well as providing sinus relief to a congested nose.
Orange Peel Wax	Orange wax is the semi-solid wax taken from orange rinds. The wax sourced by Farmaesthetics is derived without solvent extractions or chemical reactions, making it an all-natural ingredient. Orange wax as found in orange peels protects the fruit against the environment, allowing it to breath, while maintaining its essential water balance. When applied to the skin, it works in much the same way, making it a wonderfully emollient, gently protective ingredient, perfect for use around tender eye tissue.
Grapefruit Essential Oil	Grapefruit oil is used to treat acneic conditions, congested or oily skin, and cellulitis. Citrus is known for its uplifting scent and can be used as an aid to nervous exhaustion and stress.

---

Iron Oxide	A naturally occurring ore resulting from the reaction of iron and oxygen. Blood red in powder form, it lends itself well as a natural pigment and is most commonly used for the dyes in tattoos, due to its safety for use on the skin.
Mica	The word "mica" is derived from the Latin word micare, which means “glittering”. This is in reference to the brilliant appearance of this naturally occurring mineral, and Farmaesthetics uses it in its Lip Softener to add shimmer and shine for a lustrous finish to the lip.

**APPLICATIONS and BENEFITS:**

- Use anytime as a protective, moisturizing treatment balm for lips.
- Use as treatment for lips at night.
- Softens chapped, dry lips.
- Imparts a natural healthy color to the mouth.
- Speeds up healing of lips that have been damaged from fever blisters or cold sores, extreme fever or weather conditions.

**AS USED IN PROFESSIONAL TREATMENTS:**

- Apply to lips with Q-tip or as a treatment salve during facials and body treatments.
-
