

Brazilian Wax

Brazilian is a method where most of the hair is removed from the bikini area, leaving only a small strip of hair. The “Sphinx” is a method in which all hair is removed from the bikini area.

Usage:

- ❑ Remove lid from container
- ❑ Place container in melting pot. Set dial to High (H) for 15 – 20 minutes until a thick pasty consistency is achieved then turn the dial down to Low (L) for the remainder of the day.
- ❑ Cleanse the area to be epilated with *Clean and Easy* “Cleanse”, pat dry with white tissue.
- ❑ Spray treatment area with *Clean and Easy* Pre-Epilating Oil.
- ❑ Dust a thin layer of *Clean & Easy* Lavender Powder.
- ❑ With spatula, apply a thick layer of wax to a semi-small treatment area. Apply the wax at a 45- degree angle in the direction of the hair growth.
- ❑ Allow the wax to cool on the skin until it becomes soft and pliable.
- ❑ Hold the skin taut and pull wax off with one quick motion in the opposite direction of the hair growth.
- ❑ Immediately apply firm pressure to the treatment area. Never apply wax more than once to any area being waxed.
- ❑ Apply *Clean and Easy* “Remove” After Wax Cleanser to condition and refine.
- ❑ To eliminate redness and irritations apply *Clean and Easy* “Nourish” Skin Conditioner.

Note: If wax is left on too long, it becomes brittle and hard to remove.

Caution:

Test a small area for sensitivity. Do not use on recently tweezed areas or on anyone who is currently on Glycolic, Retin-A, or any other AHAs. Do not use on anyone with open lesions, warts, or a rash.
