

## Anti-Aging Lotion with Peptides

# Anti-Aging Lotion with Peptides

Sizes Available  
1oz

### Product Description:

Peptides (which help trigger collagen synthesis) and other active ingredients in this advanced moisturizing formula help improve skin clarity, firmness and elasticity.

### Skin Conditions:

For all skin types showing the first signs of aging and dehydration.

### Benefits:

- Helps reduce the appearance of fine lines
- Increases tissue hydration
- Very moisturizing and nourishing to the skin
- Offers anti-oxidant benefits to fight free radical damage

**Usage:** Apply a small amount with fingers to the entire face and neck. Can be used as often as desired.

**Treatment Room:** n/a

### Featured Actives:

**Acetyl Hexapeptide-8** - One of the newest innovations in cosmeceutical ingredient technology, this active ingredient, also referred to by its trade name, Argireline, has been found to reduce the depth of wrinkles, especially in the forehead and around the eyes. Recent studies show that the facial wrinkling is reduced by inhibiting a formation of proteins in the skin that are responsible for provoking facial muscle contractions.

**Hydrolyzed Rice Protein** - Also known by its trade name, Nutripeptides, this active ingredient, prepared from rice di- and tripeptides, helps revitalize cell metabolism, reduce surface wrinkles and improve the tone and complexion of the skin. Research shows that Hydrolyzed Rice Protein can increase the proliferation of human fibroblasts after 72 hours of treatment. Clinical trials show that after 56 days of twice daily application to the crow's feet, this ingredient can help reduce the number of wrinkles, their length, depth and total wrinkled surface.

**Silk Amino Acids** - Manufactured from pure silk fibers, the principle amino acids in this combination are glycine, alanine, and serine. Highly hygroscopic, with an enhanced moisture binding ability, Silk Amino Acids are known to penetrate into the upper layers of the skin as well as through the hair cuticle into the hair shaft, drawing moisture into these areas and improving skin hydration.

**Retinyl Palmitate (Vitamin A)** - This essential vitamin for the skin favors tissue growth, helping improve the skin smoothness, firmness and texture. Applied topically, Vitamin A helps prevent scaling and dryness. Once Retinyl Palmitate enters the skin, it converts to retinoic acid and provides rejuvenation benefits as well as helping the skin fight off infection. An excellent aid in healing damaged skin tissue.
