

CLEANING & SANITATION PRODUCTS

Effectively clean, disinfect, and sanitize equipment, implements, and surfaces vulnerable to spreading disease.

Know the difference between cleaning, disinfecting, and sanitizing?

CLEAN

Cleaning removes germs, dirt, and impurities from surfaces or objects. Cleaning works by using soap (or detergent) and water to physically remove germs from surfaces. This process does not necessarily kill germs, but by removing them, it lowers their numbers and the risk of spreading infection.

DISINFECT

Disinfecting kills germs on surfaces or objects. Disinfecting works by using chemicals to kill germs on surfaces or objects. This process does not necessarily clean dirty surfaces or remove germs, but by killing germs on a surface after cleaning, it can further lower the risk of spreading infection.

SANITIZE

Sanitizing lowers the number of germs on surfaces or objects to a safe level, as judged by public health standards or requirements. This process works by either cleaning or disinfecting surfaces or objects to lower the risk of spreading infection.

REJUVenate™ SALON & SPA DISINFECTANTS

POWERFUL
Disinfects in as little as 1 minute

GENTLE
Non-irritating to eyes and skin

COMPLIANT
EPA and FDA Registered

ECO-FRIENDLY
Active Breaks Down into Water & Oxygen

Formulated to Protect Salon & Spa

Rejuvenate™ disinfectants deliver hospital-grade strength without the harsh side effects of the chemicals you may be using now. At the heart of what makes Rejuvenate™ deliberately different is a patented technology called Accelerated Hydrogen Peroxide® (AHP®). Salon and spa professionals also get these **FREE** unique resources:

Re-Opening Toolkit

Rejuvenate™ gets your spa/salon ready for business with free print materials, checklists, client advice and more.

Online Course

Take the course and get a personalized certificate of completion to show your clients you know how to keep them safe from the spread of dangerous pathogens.
