Catalog prices are subject to change.

Terms and conditions do apply. Please read them at universalcompanies.com/terms.

FACE & EYE PROTECTION

Demonstrate to your clients you're serious about their safety by wearing face protection. For added caution, consider supplying facial protection products as an amenity.

The CDC recommends wearing face coverings in public settings.

Protect your clients, yourself, and your business with face mask tips from the CDC

Wearing protective facial coverings helps to prevent the spread of COVID-19 and should be worn even if you, your employees, and your clients do not feel sick.

Do NOT use a face mask meant for a healthcare worker.

Continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.

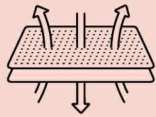

Make face masks available to your clients with a sanitation station or reusable mask options.

Designed for Comfort and Performance in a Working Spa Environment

A respected London-based company, Fashionizer Spa normally supplies uniforms to luxury spas and hotels all over the world. Since the pandemic, they've focused their design skills and materials to make lined and layered face masks to help keep spa professionals safe. While the masks aren't meant as medical devices, they have a BFE rating of 77%.

Disposable Masks

We encourage you to consider reusable masks whenever possible, especially since reliable disposable masks are difficult to source due to the priority allocations for our frontline healthcare workers. We ask that you order in limited quantities so that we may provide our products at the best prices to the widest number of spa professionals. Due to the volatility of prices and availability, we cannot backorder any disposable masks at this time.

Whether you are looking for **KN95 Masks** or **3-Ply Surgical Masks**, we only provide reliable protection from trusted manufacturers.

HAND PROTECTION

Get the gentle germ-fighting benefits of these soaps and sanitizers and protect your hands with comfortable gloves.

Hand Washing Tips*

Warm or cold water?
Either is fine as long as it's clean.

Towel or air dry?
Either is fine, but if you're using a towel, make sure it is clean.

Do I have to clean under my fingernails?
Yes, germs like to hide under nails; make sure to clean there, too.

Which is best, soap or sanitizer?
Soap and water should be your 1st choice, but hand sanitizers with 60% alcohol or more is a second best.

Does soap have to be anti-bacterial?
No, plain soap and water works just as well.

How long do I need to scrub while washing my hands?
Scrubbing your hands for at least **20 seconds** is most effective.

*SOURCE: CDC.gov

Brands You'll Love!

These brands made it a priority to formulate soaps and sanitizers that eliminate germs and dryness, providing gentle hand protection for you and your clients.

[SHOP](#)

BODY PROTECTION

Protect clothing from salon products and droplets with reusable and disposable apparel.

Reusable Apparel

Minimizes waste

When you opt for reusables such as cloth masks or salon capes, you decrease the amount of items going into a landfill.

Provides Nice Look & Feel

Real fabrics, such as cotton, often come in a choice of patterns and styles for a unique look. Texturally, they also feel good!

Reduces Replenishment

With reusables, you won't need to frequently re-order

Single-Use / Disposable Apparel

Eases Client Concerns

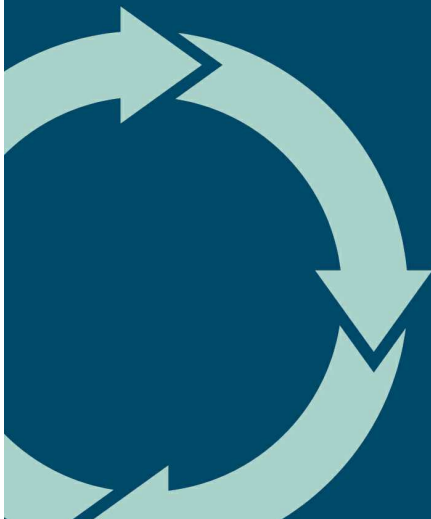

Single-use disposables convey cleanliness and concern for client protection.

Offers Quicker Turnaround

Disposable apparel, such as capes and gowns, offer a quicker turnaround between services.

Lends Efficiency

If disposable apparel inventory is properly managed, your spa or salon won't run out of capes or aprons if the laundry doesn't get done.

CLEANING & SANITATION

Effectively clean, disinfect, and sanitize equipment, implements, and surfaces vulnerable to spreading disease.

**Know the difference
between cleaning,
disinfecting, and
sanitizing?**

Cleaning removes germs, dirt, and impurities from surfaces or objects. Cleaning works by using soap (or detergent) and water to physically remove germs from surfaces. This process does not necessarily kill germs, but by removing them, it lowers their numbers and the risk of spreading infection.

Disinfecting kills germs on surfaces or objects. Disinfecting works by using chemicals to kill germs on surfaces or objects. This process does not necessarily clean dirty surfaces or remove germs, but by killing germs on a surface after cleaning, it can further lower the risk of spreading infection.

SOURCE: CDC.gov

Sanitizing lowers the number of germs on surfaces or objects to a safe level, as judged by public health standards or requirements. This process works by either cleaning or disinfecting surfaces or objects to lower the risk of spreading infection.

EQUIPMENT & BARRIER PROTECTION

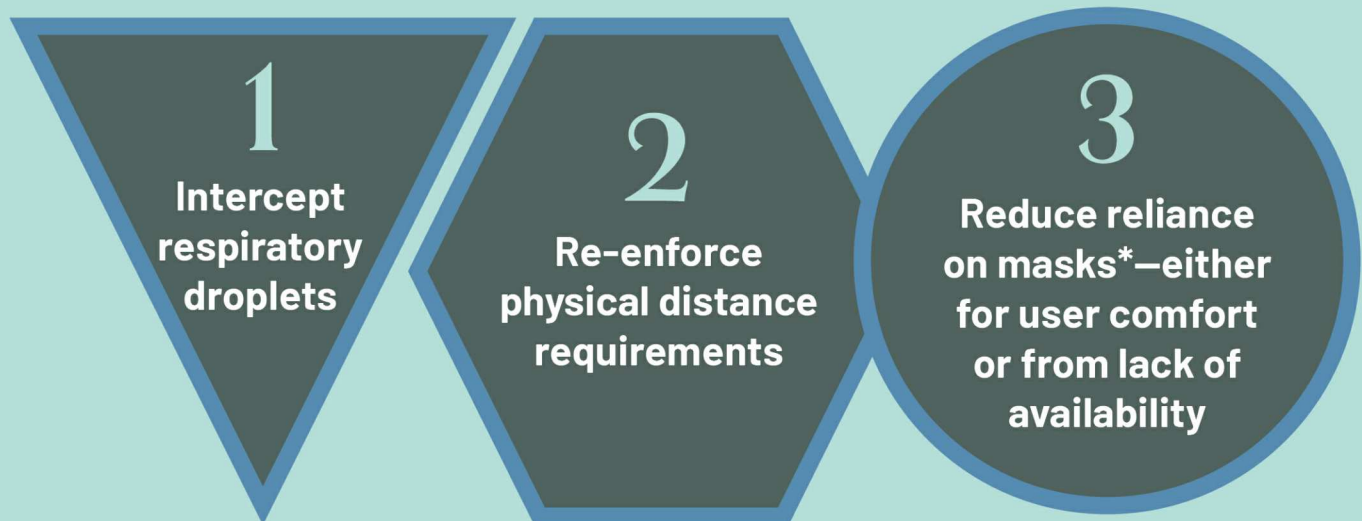

Set up uniquely designed barriers to minimize the threat of transmission and meet sanitation and distancing guidelines.

Partitions: the Great Barrier Relief

Social distancing isn't possible during spa treatments, as massage, waxing, facials all require touch. For salon services, styling and pedicure stations are often fewer than 6' apart. Sometimes clients will even forget to bring a mask

Barriers help solve all of these issues by providing 3 important functions:

**If staff and/or clients will be unmasked on opposing sides of a partition, it's essential that it has been installed and maintained such that it effectively prevents the co-mingling of droplets.*

Adjustable Table Sneeze Guard

| | | |
|-------------|----------|----------|
| SINGLE ITEM | NB108 | \$59.75 |
| CASE OF 5 | NB108-CS | \$253.90 |

- Excellent for face-to-face treatments
- Adjustable height
- Easy to assemble and disassemble—perfect for portable services!
- Impact-resistant material
- Sanitizable

\$179.00

SETTING UP YOUR MASSAGE TABLE

Safety & Comfort in 3 Easy Steps

1

USE AN ANTIMICROBIAL TABLE PROTECTOR

Table protectors help protect and extend the longevity of your table, while also preventing germs from spreading on or invading the surface.

2

ADD AN EXTRA LAYER OF COMFORT

Enhance your clients experience with an added layer of luxury.

3

INCORPORATE A MOISTURE BARRIER

Moisture barriers protect the layers beneath from being penetrated with sweat and oils and are very easy to clean.

4

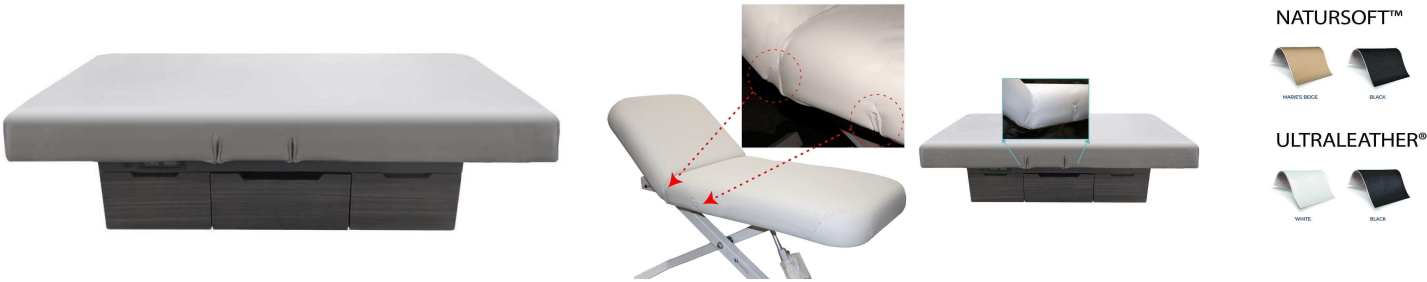

USE DURABLE SHEETS & BLANKETS

Finally, dress your table with comfortable sheets, face rest covers, and blankets that can be washed over and over without diminishing the quality.

UV STERILIZATION

Eliminate germs by utilizing the disinfecting properties of UV light.

UV LIGHT FOR SURFACE + AIR SANITATION

Ultraviolet (UV) light is part of the non-visible electromagnetic spectrum and can be harnessed to effectively sanitize the air, water, and surfaces.

At the appropriate wavelength and fluence (dose), exposure to UV light modifies or destroys the genetic material (DNA and RNA) in viruses, bacteria, and mold, preventing replication.

Niels Ryberg Finsen won a Nobel Prize in 1903 in recognition of his contribution to the treatment of diseases, especially lupus vulgaris (tuberculosis of the skin), with UV light therapy.¹

UV-C (231-280nm) must be shielded from humans as it poses a carcinogenic safety risk. Continuous low doses of Far UV-C (200-230nm) have been studied and no human effects reported.²

healthe[®]

BY LIGHTING SCIENCE

HUMAN-CENTRIC LIGHTING

Healthe is the leading provider of biological lighting solutions which help can help to regulate your body's circadian clock, boost performance, and enhance and improve sleep.

DOING MORE WITH LIGHT

We are now able to use light as a modality to impact human health, to impact the sanitation of spaces, and ultimately deliver wellbeing and healthier and cleaner spaces.

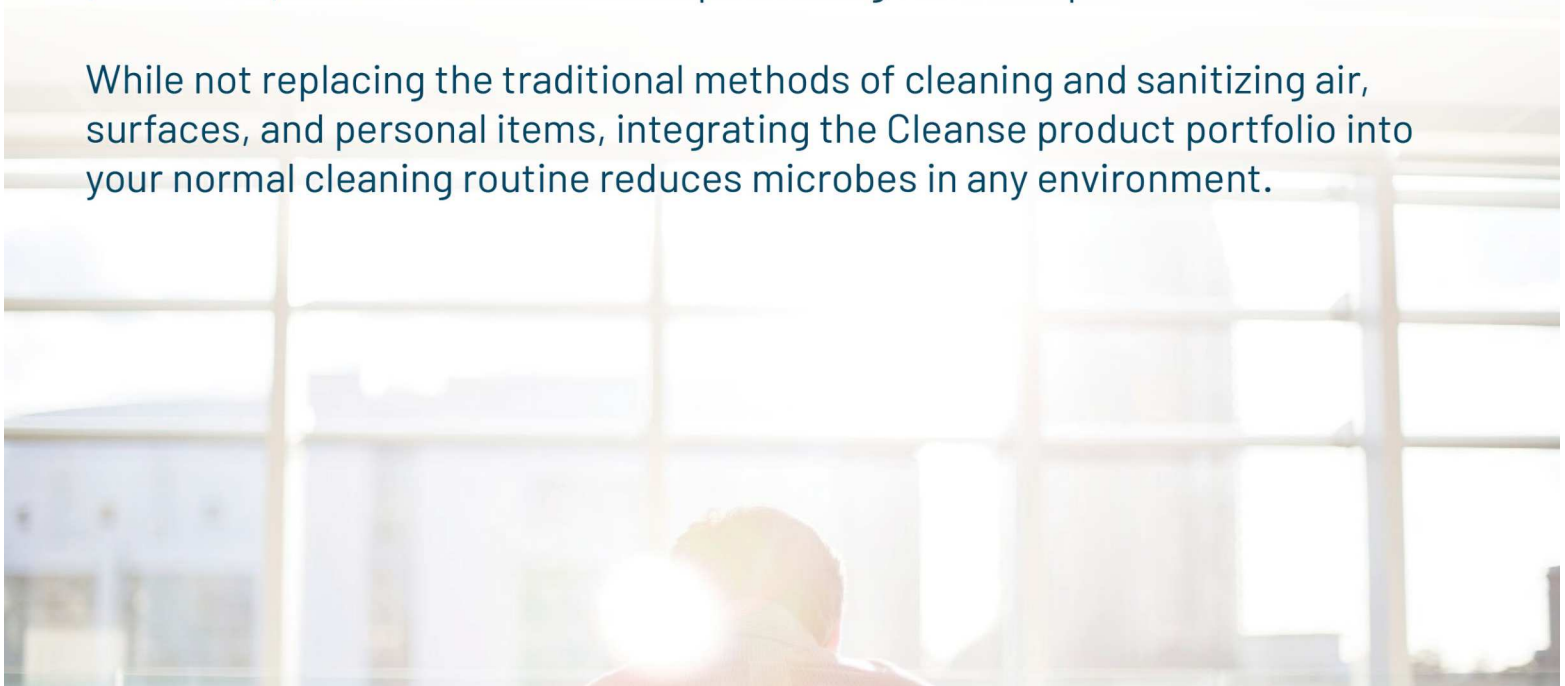

AIR + UV SANITIZATION

Healthe has patented commercial and consumer-grade technologies that utilize the known germicidal properties of UV light to inactivate airborne and surface viruses and bacteria.

Healthe's Cleanse[®] line was created to sanitize air and surfaces in our everyday environments. By employing ultraviolet (UV) technology, the Cleanse sanitization process modifies and destroys the genetic material (DNA/RNA) of bacteria and viruses preventing further replication.

While not replacing the traditional methods of cleaning and sanitizing air, surfaces, and personal items, integrating the Cleanse product portfolio into your normal cleaning routine reduces microbes in any environment.

UV Sterilization

CLEANSE® | Chemical - Free, Air, & Surface Sanitization System, Downlight, 4,000K CCT

HBLS014

\$1,500.00

CLEANSE® | CHEMICAL - FREE, AIR, & SURFACE SANITIZATION SYSTEM, DOWNLIGHT, 4,000K CCT

- Far-UVC technology effectively penetrates and inactivates air and surface microbes and is safe for human exposure
- Chemical-free process continuously improves air quality
- Select from three sanitization modes that work with an integral PIR motion sensor, including Far-UVC on for
- 30 minutes every hour, or Far-UVC only on in unoccupied spaces
- Integrated general illumination features a boost at 435nm to help activate the antimicrobial properties of TiO₂ surface coatings and cleaners.
- Retrofit any 6" conventional recessed can fixture to a sanitization downlight
- Supports multiple input voltage, 120V-277V, with a power consumption of 20W
- Made in USA and TAA compliant, it is a qualified solution for government projects. Certificate of origins are available upon request.

CLEANSE® | Chemical - Free, Air, & Surface Sanitization System, Portal Entry Gate

HBLS013

\$22,500.00

CLEANSE® | CHEMICAL - FREE, AIR, & SURFACE SANITIZATION SYSTEM, PORTAL ENTRY GATE

- Sanitize at Critical Entry Points: Position the free-standing Cleanse Portal next to any high traffic or critical entry point to significantly reduce infection transmission rates. ADA compliant.
- Far-UVC, the ultraviolet radiation band between 200–230 nanometers (nm), has been proven to penetrate and inactivate surface pathogens, such as bacteria, parasites, fungi, and viruses. Simply step into the Cleanse Portal and make a slow 360 degree turn for a 20 second dosage of Far-UVC.
- Studies indicate that there's no harm to humans from continuous low dosages of 222 nanometer, far-UVC light. Yet the source effectively inactivates over 90% of contaminants, based on the intensity and brief exposure time described.

UV Sterilization

CLEANSE® | Chemical - Free, Air, & Surface Sanitization System, Retrofit Ceiling Troffer

| | |
|-------------------|---------|
| 3000k | HBLS015 |
| 4000k | HBLS016 |
| 5000k | HBLS017 |
| \$2,000.00 | |

CLEANSE® | CHEMICAL - FREE, AIR, & SURFACE SANITIZATION SYSTEM, RETROFIT CEILING TROFFER

- Multi-stage air sanitization features HEPA-Carbon activated filtration with UV sanitization
- HEPA filter captures up to 99.97% of airborne pathogens as small as 0.3 μ while activated carbon reduces gases, odors and VOC from the air.
- Easily retrofits into any existing 2' x 4' troffer without breaching plenum—keeping facility disruptions and installation costs to a minimum.
- Recommended 8'–10' on center spacing, Troffer provides 800 ft³ of sanitizing coverage and conducts four air changes per hour (50cfm) for a 10' x 10' x 8' space.
- Advanced control features via proprietary Bluetooth wireless switch enable fan speed adjustments and dimming capabilities for general illumination.
- UV LED are safe to use without hazardous material and waste disposal concerns of a low-pressure mercury UV lamp.
