

Marine Algae Salt Blend

Description

A rich combination of sea salts, green algae, and white algae for nourishing baths and renewing exfoliation treatments.

Indications

For dull, dehydrated skin in need of exfoliation.

Contraindications

- ❑ For external use only.
- ❑ Open wounds and skin lesions.

Active Ingredients

- ❑ Sea Salts - Rich in magnesium, potassium, and trace elements that helps to combat stress and fluid retention. Mineral salts promote cellular balance.
- ❑ Green Algae - Minerals, trace elements, and amino acids that nourish and purify the skin.
- ❑ White Algae - Calcium, magnesium and sulfur alleviate water retention and restore cellular balance.

Professional Use

An excellent exfoliant and skin purifier. Combine salts with a massage oil for a hydrating exfoliating treatment. May be used in conjunction with the Vichy shower. Use appropriate amount for a thorough exfoliation treatment. Use more oil with sensitive clients and more salt with clients who are thick-skinned in need of a more aggressive exfoliation. May be added to a soaking or hydrotherapy tub.
