
Chocolate Mask

Description

This chocolate mask contains a natural moisturizing factor and hyaluronic acid that keep the skin hydrated and nutrients that smooth away uneven skin texture, promote firmness and elasticity, leaving the skin silky and compact.

Skin Type: Suitable for all skin types. Excellent for dry, aging skin.

Benefits:

- ❑ Moisturizing.
- ❑ Helps improve elasticity and skin texture.

Ingredients

Aqua, Marine Collagen, Aloe Barbadensis Leaf Extract, Glycerin, NMF, Hydrolyzed Milk Protein, Theobroma Cacao (Cocoa) Extract, PEG-7 Glyceryl Cocoate, Betaine, Sucrose, Olea Europaea (Olive) Fruit Oil, Panthenol, Hamamelis Virginiana (Witch Hazel) Extract, Trehalose, Hyaluronic Acid, Bisabolol, Phenoxyethanol, Carbomer, Triethanolamine, PEG-40 Hydrogenated Castor Oil, Fragrance

Aloe Barbadensis Leaf Extract	An emollient with hydrating, softening, healing, antimicrobial, and anti-inflammatory properties.
Aqua	Water
Betaine	A surfactant and excellent conditioner, viscosity builder, and foam booster.
Bisabolol	A botanical that has anti-inflammatory and soothing properties.
Carbomer	Thickening and suspending agent; emulsion stabilizer.
Cocoa Extract	Softens and lubricates the skin.
Fragrance	Provides an aroma to the product.
Glycerin	A solvent, humectant, and emollient. It absorbs moisture from the air.
Hyaluronic Acid	A substance that occurs naturally in the dermis. It is a natural moisturizer with excellent water-binding capabilities. When applied to the skin, it forms a film similar to the way it holds water in the intracellular matrix. The ability to hold water provides smoothness, improving the skin's appearance.
Hydrolyzed Milk Protein	Forms a film on the skin's surface which allows the skin to retain moisture.
Marine Collagen	Derived from the substance found on fish scales. Helps diminish the signs of aging and decrease the negative effects of toxins.

NMF (Natural Moisturizing Factor)	Found in the corneum layer, NMF is made up of hygroscopic (capable of absorbing moisture), water soluble substances that regulate the layer's selective permeability. When included in skin-care products, they appear to help stabilize and maintain this complex intercellular-skin matrix. NMFs help keep the intercellular area of the skin intact. This helps prevent surface irritation from penetrating deeper into the skin, helps keep bacteria out, and aids the skin's immune/healing system. Using moisturizers that contain NMFs allows your skin to repair itself without the problems brought on when skin is suffering from dryness, environmental distress, or excess irritation.
Olive Fruit Oil	A carrier oil with excellent lubricity. Helps stimulate the synthesis of collagen, elastin, proteoglycans, glycoproteins.
Panthenol	Vitamin B5 - Acts as a penetrating moisturizer. Appears to stimulate cellular proliferation and aid in tissue repair.
PEG-7 Glyceryl Cocoate	A self-emulsifying emollient for aqueous formulations.
PEG-40 Hydrogenated Castor Oil	A hydrophilic emulsifier, stabilizer, antigellant, and lubricant.
Phenoxyethanol	Broad range preservative with fungicidal, bactericidal, insecticidal, and germicidal properties.
Sucrose	An emollient, mild emulsifier, and humectant. Can be used in the place of glycerin.
Trehalose	A humectant and moisturizer. It helps bind water in the skin and increase the skin's moisture content. It is a naturally occurring plant sugar.
Triethanolamine (TEA)	An emulsifier and pH adjuster.
Witch Hazel Extract	Has anti-inflammatory and wound healing properties. Often used for its anti-itching, softening, and emollient properties.

Usage Instructions

1. Open packet, unfold mask, and place on cleansed face.
2. Leave on for 15 to 20 minutes.
3. Remove mask and discard.
4. Finish with toner and moisturizer.
