

CARING FOR YOUR PEDICURE BOWL PRODUCTS

ALL PRODUCTS - We recommend the following cleaning:

- A Mild Bleach Solution (1 part bleach to 3 parts water),
- or, Hospital Grade Disinfectant

COPPER BOWL - The copper bowl is finished with a laquer to protect the bowl from exposure to air and moisture. Copper will patina, or antique over time. To help retain the original appearance, you may wish to apply a thin coat of olive oil or baby oil to the inside of the bowl and let it sit overnight. Then polish with a soft cloth. Doing so restores the bowl's natural beauty.

STAINLESS STEEL BOWL - Towel dry your bowl after cleaning to prevent water spots which can be caused by minerals in water. Microfiber cloths are a great option to use.
