

Coconut Oil Whipped Butter

Body Butter is like lotion minus the water (most lotions are 70 to 90% water). Coconut Butter is a saturated fat from coconuts. This butter melts at room temperature and is easily absorbed. It seals hydration into the skin.

Usage

- ❑ It's a soft butter with great spreadability.
- ❑ It is a highly concentrated natural butter.
- ❑ Can be mixed with essentials, actives, and exfoliants.

Active Ingredients:

- ❑ Coconut Oil - 28%.
- ❑ Cyclopentasiloxane - A form of silicone that delivers active ingredients.
- ❑ Dimethicone - Protects the skin against moisture loss.
