Key Ingredients

- Apricot Seed: A natural peeling material when ground and incorporated into scrubs.
- Blackberry Seed: Gentle exfoliant.
- Grape Seed Oil: Has moisturizing and nourishing properties due to high linoleic acid content.
- Grape Seeds: Gentle exfoliant.
- Olive Oil: Stimulates the synthesis of collagen, elastin, proteoglycans, and glycoproteins.
- Organic Shea Butter: Revered for centuries by the women of Africa, Shea butter is a renowned skin soother. Obtained from the karite nuts of a tree native to the West African tropics, the supple butter's high concentration of fatty acids gives it the ability to deeply moisturize and retain the elasticity of the skin, while also protecting against the damaging effects of the sun.
- Organic Soybean Oil: Helps stimulate the production of collagen, elastin, proteoglycans, and structural glycoproteins.
- Organic Sugar: Pure organic sugar crystals gently polish skin by mechanically removing the web of dead cells which routinely cling to the skin and dull the complexion.
- Organic Sunflower Oil: The seeds of that brilliantly colored yellow flower yield this versatile oil. Rich in essential fatty acids, sunflower oil conditions and regenerates the skin with generous doses of vitamins A and E.
- Red Wine: As beneficial for the skin as it is for the heart, red wine is brimming with potent antioxidants, including resveratrol and polyphenols. These key components put the brakes on premature aging by slowing the oxidation of the skin.
- Vitamin E: A well-known and trusted partner in skin care, vitamin E is an effective antioxidant. In addition, it is readily absorbed into your skin and creates a shield that protects against ultraviolet light skin damage, the leading cause of visible skin aging.
