

Emu Oil

Emu Oil has been shown to have unique healing properties. Aborigines of Australia have used Emu Oil for thousands of years to reduce the pain and swelling of arthritis, to heal wounds & burns, and to reduce the pain, itch, and swelling of insect bites and stings.

Highly moisturizing, Emu Oil is a natural skin softener and has rejuvenating properties. Non greasy and highly penetrating, it has been shown to help reduce the depth and length of fine lines & wrinkles. Emu Oil penetrates into the skin quickly and deeply, making it an excellent trans-dermal carrier for any other added moisturizers or therapeutic ingredients.

Emu Oil is natural and non-toxic, non-comedogenic, hypo-allergenic, and gentle for all skin types.

An effective anti-inflammatory, the potency of the anti-inflammatory effect from Emu Oil is similar to ibuprofen without the negative side-effects frequently common with traditional prescription or corticosteroid based anti-inflammatory medications.

Emu Oil helps benefit the following conditions and problems:

Acne	Frostbite	Scrapes & scratches
Age spots	Growing pains	Shin splints
Arthritis	Hair loss	Shingles
Athletes foot	In-grown toenails	Skin rashes
Bed sores	Insect bites	Skin hydration
Bruises	Irritated skin	Sore muscles
