

Akileine Peel Cream

An ideal peeling cream to smooth and soften rough skin. Helps eliminate accumulated dead cells and calluses. Recommended for callosity, hyperkeratoses, and dry and thick soles. Can also be used on knees and elbows.

Usage

1. Prepare a footbath of warm water mixed with 2 tablespoons of bath salts.
2. Soak feet for 10 minutes.
3. Dry feet and apply a thin layer of peel cream all over the soles of the feet.
4. Begin peeling gently using circular motion until cream rolls and falls off the skin.
5. When finished peeling, rinse feet and continue treatment.

Home Usage

- Same as professional use
- After rinsing the skin from the peeling process, dry feet and apply dry foot cream
- Use peeling cream once or twice a week

Active Ingredients

- Silica- Natural exfoliating agent
- Polyethylene- Exfoliating grains (beads)
