

Elastic Body Wraps

A great alternative to the traditional linen body wrap.

Usage:

- ❑ Prepare an herbal tea in a standard Hydrocullator or Moist Heat Unit.
- ❑ Insert enough wraps for a treatment - usually 6 to 8 wraps per person.
- ❑ Allow to absorb nutrients from tea for approximately 20 to 30 minutes.
- ❑ Beginning at the leg, wrap around client as you would a bandage, working quickly to avoid cold discomfort.
- ❑ When each section is completed, cover the client with a warm or hot towel.
- ❑ Follow same wrapping procedures for warmth as you would a typical wrap.
- ❑ Remove and moisturize.
- ❑ Great for spot treatments.
