

Massage Holsters

Usage:

- ❑ Wrap the holster belt around your waist with the pouch side of the holster away from your body and lock it into place with the plastic tabs.
- ❑ Loosen or tighten the belt so that it fits comfortably around your waist.
- ❑ Before you begin to massage your client, position the holster so that it is away from the table and out of your way.
- ❑ To retrieve oil or lotion, simply push the pump of the bottle with thumb so that oil or lotion will fall into your palm.
- ❑ Occasionally oil and lotion will spill in the holster. Simply clean with hot water and a clean cloth. Holster is machine washable only...DO NOT PUT IN DRYER.
- ❑ If traveling with the oil holster, remove the bottle from the holster and hold it over a sink. Push the spout down with your palm as you turn counter clockwise. Most spouts will lock into place

NOTE: Bottles not included
