

Cream Depilatory Wax

Also known as a “soft wax”, Cream Depilatory Wax is used for normal to sensitive skin. It works well on short, coarse, stubborn hair (bikini). The cream wax has a drier formula that doesn't leave residue. Muslin strips are recommended with this type of wax. Light caramel in color, its' consistency is smooth, yet thicker than Classic Wax.

Usage

1. Heat wax until it flows easily.
2. Stir for consistency.
3. Bath temperature medium.
4. Use pre-wax spray to prepare for larger areas.
5. Use tea tree oil for small areas and for increased numbing.
6. Apply a light coat of dusting powder.
7. Apply wax in a thin layer (as thin as possible) in the direction of the hair growth.
8. Apply a strip of muslin over the treatment area.
9. Rub strip in direction of hair growth to form a good bond.
10. Remove with a quick, close pull opposite to the direction of the hair growth and parallel to the body.
11. Soothe treatment area with tea tree oil.

Active Ingredients

- ❑ Pine Resin - gentle even for sensitive skin types.
- ❑ Tea Tree - Antiseptic with germicidal properties.
