

## **French White Hard Wax**

---

Formulated for fragile, frail skin that is thin, abused, or has been chemically treated. Not recommended for coarse hair. Derived from beeswax, natural rosins, and sweet almond oil. Used without pella or muslin and used on small areas only. Classified as a “Hot Wax” by European trained Estheticians.

### **Usage**

1. Heat wax until it flows easily.
2. Stir for consistency.
3. Bath temperature low-medium.
4. Does not have the spread-ability of a soft wax.
5. Use tea tree oil to increase numbing if needed.
6. Apply a light coat of dusting powder.
7. Apply wax in a thicker layer ( 1/8 to 1/16 inch thick) in the direction of the hair growth. If applied too thin, it will crack in pieces on removal
8. The wax will change from a dark green color to a pale green color when dry.
9. Once dry the wax maybe peeled off like a band-aid strip.
10. Remove with a quick, close pull in the opposite direction of the hair growth parallel to the body.
11. Soothe treatment area with tea tree oil.

### **Active Ingredient**

- ❑ Sweet Almond Oil - Provides an elegant skin feel and contains linoleic acid.
- ❑ Beeswax - one of the oldest ingredients used in waxing preparations. Also, is credited being an anti-oxidant, anti-inflammatory and germicidal.
