

Beta Peel 22% (pH3)

Sizes Available
6oz

Product Description:

This deep clarifying treatment refines and resurfaces by actively exfoliating the top layers of the stratum corneum, enabling it to penetrate, rid the pores of acne-causing build-up and help fade hyperpigmentation.

Skin Types & Conditions:

All skin types. Targeted for active acne or acne-prone skin. Do not use if allergic to aspirin.

Benefits:

- Dissolves pore-clogging debris
- Reduces acne lesions and inflammation
- Fades post-blemish hyperpigmentation
- Diminishes and helps prevent scarring

Usage: After cleansing, apply a thin coat with a fan brush to face and neck. Avoid eye, nose, and mouth openings. Client may experience a mild tingle and the skin will become pink. Leave on 2-4 minutes. Remove completely with a wet towel or sponge. Refer to Control Corrective's *Technical Manual* for complete instructions.

A series of 8 to 10 treatments, performed weekly, will progressively improve skin texture, pigment, brightness and tone, and often control many types of acne. For clients looking for an intensified boost, most complexions can tolerate an 8-week series twice a year. Also excellent as part of monthly maintenance facial.

Treatment Room: Beta Clear Facial.

Featured Actives:

Salicylic Acid (22%) - In a low percentage, salicylic acid helps dissolve the top layer of the stratum corneum very gently, dissolving the flaky dead cells that are often a side effect. This also allows the other active ingredients to penetrate and act more effectively below the surface of the skin. This ingredient is derived from the bark of sweet birch and the leaves of the wintergreen plant.

Beta Peel 22% (pH3)

Beta Peel 22% (pH3)

Vitamin E (Tocopherol) - An antioxidant found in essential oils and vegetable oils. Also known as tocopherol, this wonderful vitamin, when applied topically, is well absorbed through the skin. It is attributed with reducing skin pigmentation, decreasing functioning of the sebaceous glands, increasing water retention in the skin, and serves as a super antioxidant and free radical scavenger. It is also helpful as an UV protectant.

Panthenol - This highly moisturizing ingredient aids in tissue repair and stimulates cellular proliferation. Panthenol also helps the skin promote wound healing and is anti-inflammatory.

Mallow Extract - Highly anti-inflammatory, mallow extract has been used for centuries in the treatment of wounds. When in contact with water, this extract, derived from leaves and flowers of *Malva sylvestris*, swells and forms as healing gel.
