

## Acne Treatment Cream

Sizes Available  
2.5oz

### Product Description:

Liposome encapsulated salicylic and lactic acids exfoliate and decongest yet maintain comfortable skin hydration. A great moisturizer for acne-prone skin!

### Skin Conditions:

For all skin types and acne severities, but particularly beneficial to those who are sensitive or dehydrated.

### Benefits:

- Helps eliminate blackheads and whiteheads
- Helps balance normal/dry combinations
- Smooths the skins texture
- Improves hydration without being oily

**Usage:** After cleansing, apply sparingly to the affected areas. It is always recommended that usage begins every other day the first week, daily the second week, and twice daily thereafter if needed. Will make skin more sun sensitive so sunscreen is recommended when sun exposure is expected.

**Treatment Room:** n/a

### Featured Actives:

**Salicylic Acid 3%** - This ingredient aids in dissolving the top layer of the stratum corneum by virtue of its keratolytic nature. Salicylic acid is a chemical derived from the bark of sweet birch and leaves of wintergreen. It is ideal in a 3% concentration formula and has the most impact with respect to exfoliation at home. Known for its antiseptic qualities as well, this ingredient is excellent for most skin types (except very dry or sensitive skin). The 3% concentration in this product is much higher than the over-the-counter strengths that typically are a much lower strength, usually a percentage of .05%, (often not strong enough to achieve the best results).

**Lactic Acid 2%** - Used for a thousand years to treat dry and sensitive skin as it smooths and promotes healing. The multi-purpose benefit of moisturizing and exfoliating make it ideal for clients suffering with acne, surface dehydration, fine lines, and mild hyperpigmentation. Derived from sour milk, lactic acid has a better water intake capacity than glycerin, and is agreeable even to the most sensitive skin types.

### Acne Treatment Cream

**Witch Hazel Extract** - Known for its astringent properties. Witch Hazel extract is also toning, anti-inflammatory, and regulating. Derived from the leaves and bark of the tree, also known as Hamamelis, it has a proficient vasoconstrictor effect that is excellent for inflamed, irritated, or acneic skin conditions. Research has shown that Witch Hazel is effective against free radicals and acts as a UVA and UVB absorber. It is also used in ointments for the treatment of sunburns, bruises and insect bites.
