

Aroma Matte Day Cream SPF 30

Aroma Matte Day Cream SPF 30

Sizes Available
2.5oz

Product Description:

Japanese green tea plus multi-vitamins inhibit aging, free radical damage. Microfine zinc and other skin defenders provide broad spectrum physical sunscreen protection from both UVA (the aging rays) and UVB (the burning rays) radiation. Safe for sensitive skin or those with hyper-pigmentation.

Skin Conditions:

For all skin types, particularly those who are oil-prone or oil-averse.

Benefits:

- Hydrates and balances the skin
- UVA/UVB protection and Moisturizer in one
- Non-irritating to all skin types

Usage: Apply to clean skin at least 15 minutes prior to sun exposure. May be used as often as desired. Ideal for normal or normal/oily combination types. Penetrates quickly leaving a matte finish. Safe for sensitive types.

Treatment Room: Beta Clear Facial, Clarifying Enzyme Facial

Featured Actives:

Zinc Oxide 2% - This technologically advanced patented formula of zinc oxide blocks both UVA and UVB rays. It provides the broadest spectrum protection of any single sunscreen ingredient. Zinc oxide is an inorganic sunblock, also known as a "non-chemical" sunblock ingredient. It is not absorbed into the skin and is recognized as a treatment for calming irritated skin.

Benzophenone-3 4% - A safe and effective sunscreen ingredient that is one of the most effective and highest rated substances to absorb UVA and UVB rays.

Ethylhexyl Methoxycinnamate 5.5% - Its primary use to absorb UV-B rays from the sun, protecting the skin from damage. It is also used to reduce the appearance of scars.

Ethylhexyl Salicylate 3.5% - Absorbs ultraviolet light, protecting skin from the harmful effects of exposure to sunlight. It also contains a fatty alcohol, adding emollient and oil-like (water resistant) properties.

Aroma Matte Day Cream SPF 30

Vitamin E (Tocopherol) - An antioxidant found in essential oils and vegetable oils. Also known as tocopherol, this wonderful vitamin, when applied topically, is well absorbed through the skin. It is attributed with reducing skin pigmentation, decreasing functioning of the sebaceous glands, increasing water retention in the skin, and serving as a super antioxidant and free radical scavenger. It is also helpful as an UV protectant.

Ascorbyl Phosphate (Vitamin C) - This antioxidant ingredient plays an important role in lightening discoloration and has an astringent quality beneficial to all skin types. Also known as Vitamin C, it is considered the most important water-soluble antioxidant as it acts as a collagen biosynthesis regulator.

Japanese Green Tea Leaf Extract - Over the past few years there has been a wealth of information uncovered about the effects of Japanese Green Tea in the skin. Scientists have determined that compounds in green tea called polyphenols help eliminate free radicals, and provide strong antioxidant benefits due to its catechin content. Japanese Green Tea also safeguards healthy cells, is known to be anti-inflammatory and antibacterial.
