

Dermal Flash Peel

Sizes Available
4oz

Product Description:

This super-intense, rejuvenating boost not only helps skin look younger but actually start to function younger as well, producing a radiance and tone not found in many other exfoliation procedures. An excellent alternative to exfoliating AHA and BHA peels, the Dermal Flash Peel lightly exfoliates without dryness while offering the significant bonus of increasing microcirculation, oxygenating tissues and delivering visible firming.

Skin Types & Conditions: All non-sensitive skin types. Targeted for mature or sun damaged skin with poor elasticity.

Please Note: While allergic reactions are uncommon, if a client continues to feel burning, stinging or irritation after 10 minutes of application, have them splash cold water and the stinging or burning should subside.

Benefits:

- Smooths fine lines and wrinkles
- Firms and tightens
- Evens out pigment
- Enhances surface glow

Usage: For professional use only. Detailed instructions are found on the product pages of the Control Corrective Skincare Technical Manual.

A series of 4 peels, performed weekly, will smooth and revitalize neglected, sluggish or dull skin. Also excellent as part of a monthly maintenance facial.

Treatment Room: Dermal Flash Facial

Featured Actives:

Cassia Oil - Also known as Chinese cinnamon, Cassia oil is extracted from the plants leaf and bark. Its benefits include vascular stimulation, antiseptic, and soothing.

Phenol - A cosmetic grade phenol product that is considered very safe. The percentage of phenol used in this product is less than the percentage used in over the counter mouth-washes and its benefits are the ability to trap free radicals and stimulate vascular dilation.

Chloroxylenol - A safe, non-toxic and non-irritating preservative. Preservatives are used to insure that a product is kept from producing bacteria, discourage microorganisms from changing the composition of a product and provide a good shelf life.
