

## Intensive Body Smoothing Lotion

# Intensive Body Smoothing Lotion

Sizes Available  
6oz

### Product Description:

Powered by 20% glycolic acid, Intensive Body Smoothing Lotion can even out the roughest of situations including bumpy keratosis pilaris on the arms, mottled age spots on the chest, or dry cracked skin on the knees, elbows and feet.

### Skin Conditions:

For all skin types.

### Benefits:

- Reduces the signs of aging including rough and dry skin on the body
- Skin is smoother and soft

**Usage:** Apply every other day to affected areas until skin is smooth and soft. Mild stinging may occur for several seconds when applied. Continue using as needed. Follow with sunscreen 15 minutes prior to sun exposure.

**Treatment Room:** n/a

### Featured Actives:

**Glycolic Acid 20% (3 pH)** - Dissolves the intercellular cement responsible for abnormal keratinization. For the treatment of hyperpigmentation, it aids the other active ingredients in penetrating the skin and reaching the target melanocyte cells, as well as exfoliating the surface pigmentation that becomes darker due to sun exposure.

**Aloe Vera** - Known for its anti-inflammatory and antibiotic properties. Aloe Vera is made up of the most precious substances of our own skin, enzymes, vitamins, proteins, and minerals that support all our skins functions and activate the skin's self-healing qualities. Aloe Vera helps maintain the skin's moisture balance and stimulates blood circulation. It has been used to calm and soothe burns and irritations. Furthermore, it moisturizes.

**Vitamin E (Tocopherol)** - When applied topically is absorbed through the skin. It is attributed with reducing skin pigmentation, decreasing functioning of the sebaceous glands, increasing water retention in the skin, and serving as a super antioxidant and free radical scavenger. It is also helpful to protect against UVA and UVB sun damage.

**Glycerin** - Helps the skin retain moisture
