## Seawater & Alginate Mask

### Description

The Seawater and Alginate Mask helps vitalize cells. It is a gellifying mask that contains marine trace elements that are essential for various metabolic functions of the skin. In particular, they are involved during the renewing process of the skin cells and the healing of the epidermis.

**Skin Type:** All skin types, especially sensitive skin.

### Benefits:

- ❑ Helps vitalize cells
- ❑ Heals of the epidermis

### Ingredients

Alginate, Seawater.

Alginate	A thickener that is obtained from marine extracts.
Seawater	Humectant, skin conditioner, and solvent. Salts in the sea water help to draw out toxins, microscopic dirt, and pollutants. Seawater also stimulates skin cells in normal metabolic detoxifying and cleansing processes. Salt in seawater exfoliates the outer surface of the skin, removing dead skin cells and revealing fresh new cells and leaving the skin feeling softer. Seawater is also full of minerals that the body needs for its normal regulatory processes.

### Usage Instructions

1. Using a rubber mixing bowl, mix 90 ml (approximately 3 oz.) of water (at 68° F) to 1 packet (30 g or approximately 1 oz.) of powder.
2. Stir vigorously for 1 minute to create a creamy paste.
3. Immediately apply the paste to the face avoiding the area around the eyes.
4. The mask should set within 5-6 minutes.
5. Leave the mask on the face for at least 15 minutes.
6. Remove the mask by peeling off in one piece.
