

The Science of Slow Beauty

Handprint hand serum delivers a slow aging concentrated formula featuring Swiss Apple Stem Cells.

MADE WITH
72%
CERTIFIED ORGANIC
INGREDIENTS

Swiss Apple Stem Cells deeply penetrate and regenerate skin cells, promoting healthy youthful skin. Delivers a high concentration of plant actives to renew and restore hands back to their youthful radiance.

1 Fl Oz / 30 mL ITEM #82164

4 Fl Oz / 118 mL ITEM #82168

How it Works

Swiss Apple Stem Cells complex works to slow down the aging process within the skin's cells, allowing the skin to recover faster against environmental transgressions, stress, and chronological aging by mimicking the skin's recovery response of your youth; revealing more radiant, smoother, and youthful looking hands.

Step 1 Massage 1-2 drops of Handprint Hand Serum morning and evening. Allow the serum to seep into the skin for 5 minutes.

Step 2 Apply Handprint Hydrating Hand Salve to the hands to seal in moisture and to add a protective barrier following Handprint Hand Serum.

Eco-Conscious Aspects
