

Intensive Service Aftercare Instructions

1. Do not touch or rub your eyes, eyelashes, or eyebrows immediately after the Intensive tinting service.
2. If redness or irritation occurs, apply a cool damp cotton compress to your eye area.
3. If symptoms persist for more than 24 hours, seek medical advice.
4. The effects of the Intensive service will start to diminish within 2 to 3 weeks as hair grows out and the color fades. Strong sunlight/UV light can make the Intensive color fade faster.
5. Avoid washing your hair, eyelids, eyelashes, eyebrows, or swimming for 24 hours, as these activities can cause the Intensive service results to fade.
6. Avoid exfoliating facial cleansers as those containing AHAs or other chemical exfoliates may decrease the life of the Intensive service application. A gentle facial cleanser or eye makeup remover is recommended 24 hours after the Intensive tinting service.
7. Do not apply makeup or mascara to lashes or receive any other eye services for at least 24 hours after the Intensive Lash or Brow tinting application.
8. Use oil-free makeup remover and facial products around the eye area to prolong the Intensive color.
9. For best results, rebook your Intensive Lash and/or Brow service every 3 to 4 weeks.
10. For additional questions pertaining to Intensive post-care, please contact your professional Intensive provider at your salon/spa.
