

July 31, 2013

Quasar Bio-Tech, Inc. would like to announce that we are extending the warranty on the Baby Quasar line of devices to a lifetime warranty (formerly five years). We have the best devices on the market that are durable and provide sustained results. Our experience in manufacturing the highest quality LED devices has led to a less than 1% defect rate.

The Baby Quasar product line, including the Baby Quasar Plus, Baby Blue, Quasar MD Plus, and Quasar MD Blue will have a lifetime warranty. This includes all devices sold prior to this announcement.

Quasar Bio-Tech, Inc. warranties are 'repair or replace.' Customers with a defective product may return it for an immediate replacement, if it cannot be repaired.

We would like to announce this across all available outlets to inform our customers and associates alike. To request marketing support on this matter, please connect directly with Alex Webster, Baby Quasar's Director of Marketing (contact information is below). We have the best warranty in the industry and informing our customers is crucial. This is a very exciting time for our industry and Quasar Bio-Tech will continue to raise the standards.

Thank you for your support,

Julian A Koch  
Vice President, Sales
