- Dowel Diameter: 3/4"
- Fits 8" on center outlets
- Longer extension legs offer full adjustability for spa mattresses up to 6" thick

TRI-FLEX™

SELF-ADJUSTING PLATFORM & CUSHION

The Tri-Flex Self-Adjusting Facecradle represents a dramatic advancement to the patented Tri-Flex™ self-adjusting facecradle, considered by many professionals to be the world's most comfortable headrest. The Tri-Flex™ uses an added layer of adaptability to help solve the age-old problem of face down headrest discomfort experienced by most massage clients. The Tri-Flex's patent pending platform design features eight (8) independent Soft-Petal™ suspension pads, which flex and pivot according to the shape of your face, creating a soft, trampoline type cradle effect.

In addition, the three-part Tri-Flex base also adapts independently to reduce and distribute load pressure with flexible connective tissue. Finally, the luxurious Strata Cloudfill™ Facepillow blends plush, gel infused Cloudfill and a supple memory cushion wrapped in our eco-friendly, double-stitched, 100% PU Comfort-Flex™ upholstery. The Tri-Flex™ features a patented extended three-bar linkage adjustment arm system offering perfect client head positioning in both angle and height even for today's thicker table mattresses. The Tri-Flex™ features super-strong, carbon fiber infused molded arms with slight curvature to ensure a snug fit in all standard 8" on center facecradle outlets. A geared locking mechanism prevents slippage during massage.

There's a new standard in facecradle comfort, and it's called Tri-Flex™.
