

(BODY RESCUE)

PRESSOPANTS

Dermofibra BIO INFRARED
leggings

The innovative Dermofibra® yarn contained in the Arosha by BeGood pressopants have been developed to stimulate circulation, drain excess fluids, improve skin tone and eliminate cellulite in a simple and easy way.

PROBLEM

Skin swelling
Heavy legs
Microcirculation
problem

EFFECT

Slimming & push up
Micro massage sensation
Improvement of microcirculation and tone
Improvement of cellulite appearance
Reshaping of silhouette

IMPORTANT COMPONENTS

Dermofibra® yarn - Linked to organic crystals by nanotechnology, it is able to carry out a beneficial, cosmetic action for the body. Once stimulated by the body heat, the organic crystals in the Dermofibra® reflect bio-infrared that penetrate the skin layers and the subcutaneous tissue and interact with the water and the organic compounds present in these tissues. The heat generated by the bio-infrarreds facilitates the relaxation of contracted muscles and improves the micro-circulation. Bio-infrarreds also stimulate the micro-circulation and the metabolism thanks to its draining action, improving the appearance of cellulite and reshaping the silhouette.

Pure Resistex Silver (99.9%) - Is the special antibacterial fiber which composes Arosha Pressopants gusset.

INFO

- Suitable for daily/night use, alone or under the clothes, sport activities.
- Long-lasting high quality yarn able to maintain its function even after multiple washings.
