

CEL TERM

HOT

Cosmetic treatment against cellulite

Able to stimulate metabolic exchanges and consumption of oxygen in the adipose tissue. It contrasts the stagnation of liquids and toxins, the main cause of cellulite appearance.

PROBLEM

Adipose Cellulite

EFFECT

Slimming
Fat burning
Improved elasticity
Cm loss

DRAINAGE ●●●●●

LIPOLYTIC ●●●●●

FIRMING ○○○○○

ACTIVE INGREDIENTS:

Caffeine - The most efficient active in body cosmetics because of its lipolytic action. Indeed, it is able to promote the degradation of tryglicerides in the adipocytes by reducing their volume and prevent absorption of carbohydrates.

Centella asiatica - Antioxidant with capacity to stimulate fibroblast activity and create new collagen fibers. Gives relief to swollen legs and promotes drainage for a smooth and more elastic skin. Vaso-protective and venotonic.

Fucus vesiculosus extract - With its depurative properties, it removes waste and toxins from the body and stimulates fat metabolism. The presence of "iodine" helps to destroy hypodermic fat deposits.

Vanillyl Butyl Ether (VBE Hot Act) - Active ingredient to impart warming sensation. It creates the feeling of heat inside the tissues but has the capacity to not provoke redness on skin.

INFO

Optimal to combine with Arossha pressotherapy + ultrasound/Waveshape 2.0

Bandage with HOT EFFECT

- Feeling of heat in deeper layers of the skin
- Does not provoke redness
- Not to be used in case of varicose veins
- Acts on vasodilatation

FOR THE BEST RESULTS, COMBINE WITH

AQUA DRAIN and SLIM CEL (see protocol sheet)

2 bandages - 250 ml/each: 10 cm x 10 m in extension (46% viscose - 54% polyamide)
Available in: - Standard Box (4 Cel Term)
