ACTIVE INGREDIENTS

Algae Klamath - Extracted from the Klamath Lake in Oregon, it is able to stimulate the fibroblast activity that produces the extracellular matrix and the production of new collagen meanwhile providing minerals, antioxidants, vitamins and linoleic acid Omega to the skin.

Spiruline - Natural aminoacid rich in minerals, able to stimulate production of new collagen.

Carnosine - An anti-aging peptide which, by virtue of its natural antioxidant and anti-glycation properties, is able to contrast natural aging processes by reducing oxidation reactions. High ability to fight free radicals.

INFO

Athermic treatment. Optimal to combine with Arosha ultrasound/Waveshape 2.0
2 bandages - 250 ml/each
10 cm x 10 m in extension
