

GLACIAL BLEND Stone/Shell Activation

1. Pre-chill the System

ICE WATER

< 35°F
1.7°C

STONES*

* Pre-chill stones with ice water or freeze

2. Activate the Stones

ADD CHARGE

Pour minerals into stone

< 35°F
1.7°C

SLOWLY POUR ICE WATER INTO STONE UNTIL FULL

Allow gel to form

REPLACE CAP

Allow 10-seconds for gel to form and replace cap

Note: Ice-cold water is approximately 35°F/1.7°C

- * For best performance, activate with water close to freezing (32°F/0°C)
- * Glacial Charge lowers water temperature by 4°F to 5°F or 4°C to 5°C
- * When not in service, place stone in bowl of ice
