

Cupping is a safe, non-invasive, non-surgical, luxurious express facial in the comfort of your own home. Add this easy and ultra-relaxing step to your morning ritual to reduce puffiness under your eyes, stimulate the production of natural collagen, and lift your brows.

EYE AND LIP CUPPING BENEFITS

- Increased blood flow will boost collagen formation, leading to diminished wrinkles
- Combine with active aromatherapy oils and serums to penetrate deeper, increasing results
- Excess fluid will drain faster, relieving under-eye bags and puffiness
- Broken facial capillaries will vanish as fresh blood will remove the de-oxygenated debris
- It can prepare the skin for extraction, thereby lessening the possibility of trauma to the skin

BACETTI CUP BENEFITS

- Specialized in eye and lip care
- Regenerate the upper lip's collagen for natural plumping
- Tackle eye bags, fine lines, and wrinkles
- Lift the brows

INDICATIONS

CONTRAINDICATIONS

- Active acne
- Thrombosis
- Open cuts or abrasions
- Botox for the 1st five days after injections
- Cancer
- Rosacea/Weeping eczema
- Sunburn

DIRECTIONS

The cup can be used in various different methods, as with the other facial cups, with cleansers and non-granular exfoliators. However as the Bacetti Cup is focused on the brow, eye, and lip area best to use/combine it with a serum, the facial Genie oils, or balms.

Use your Bacetti Cup in conjunction with one of the facial Genies, the Nautilus Luminescence Anti-aging Balm, Eye'm Too Sexy or Plump up the Volume serums. Achieve deeper product penetration by combining your cups with your choice of product. Use slow movements, such as circles and draining from the midline to the temples, ears, or jawline, as this is where your facial lymph nodes are situated. The Bacetti Cup is focused on lifting the brows and minimizing fine lines and wrinkles around the eye and mouth area as well as plumping the lips.

CARING FOR YOUR CUPS

- Wash with a disinfectant liquid soap after each use.
- Do not use any mineral oil or mineral oil-containing product with your Bellabaci cups.
- Take note of seasonal changes in temperature or if you use air-conditioning, as too hot or too cold will affect the pliability of your cups. They will become harder in cold temperatures and softer in warmer temperatures.
- To combat this, either place them in hot water to make them softer, or put them in the fridge for a few minutes to make them harder.
