

HAND PROTECTION PRODUCTS

Get the gentle germ-fighting benefits of these soaps and sanitizers and protect your hands with comfortable gloves.

Hand Washing Tips

Warm or cold water?
Either is fine as long as it's clean.

Towel or air dry?
Either is fine, but if you're using a towel, make sure it is clean.

Do I have to clean under my fingernails?
Yes, germs like to hide under nails; make sure to clean there, too.

Which is best, soap or sanitizer?
Soap and water should be your 1st choice, but hand sanitizers with 60% alcohol or more is a second best.

Does soap have to be anti-bacterial?
No, plain soap and water works just as well.

How long do I need to scrub while washing my hands?
Scrubbing your hands for at least **20 seconds** is most effective.

Brands You'll Love!

These brands made it a priority to formulate soaps and sanitizers that eliminate germs and dryness, while providing superior hand protection that is gentle on the skin.

Disposable Gloves

Quality disposable gloves are difficult to source due to the priority allocations for our frontline healthcare workers. Because of this volatility, prices and availability are subject to change without notice; however, we have shipments arriving daily. So, if you find something out of stock, we will happily notify you so that you are first in line to know when more gloves arrive.

[SHOP GLOVES](#)

Clear Poly Gloves

Use for cleaning the spa or for front desk staff to handle money, and save your nitrile or vinyl gloves for services!

Vinyl Gloves

Ideal for less hazardous applications, such as non-sterile medical applications or salon services like washing and rinsing hair.

Nitrile Gloves

A smooth comfortable fit that molds to the natural shape of the hand and provides incredible tactility. Excellent for facial, lash and brow or other services requiring thinner gloves with a high degree of dexterity.
