

## 50% Glycolic Acid Peel

Cost Per Treatment: **\$1.89**

Time: **45 minutes**

What to Charge: **\$95-\$120**

This peel uses the power of glycolic acid to exfoliate the skin, helping to reduce the appearance of acne, scarring, fine lines, and texture or pigment irregularities. Perfect for those looking to tackle aging or acne-prone skin.

### What You'll Need:

- 50% Glycolic Peel, pH 1.7 (4 fl. oz.) / N9101

### Recommended Supplementary Products:

- PSN122 Prosana Cleansing Cream, 16 fl oz
- PSN127 Prosana Refining Mist, 8 fl oz
- PSN125 Prosana Neutralizing Solution, 8 fl oz
- N9104 Prosana Cooling Mask
- PSN129 Prosana Calming Balm, 8 oz
- Petroleum Jelly

### **Skin Types & Conditions:**

- Great for aneic, dry, sun damaged, and aging skin. Also works well for texture irregularities and actinic keratosis.

### **Important Notes:**

- **Professional use only**
- This treatment shouldn't be performed on any client:
  - Who suffers from any skin condition or serious medical condition, such as immune disease, cancer, diabetes, eczema, psoriasis, or herpes
  - Who are pregnant or lactating
  - Who have an active facial rash, cold sores, or lesions
- A patch test is recommended 24-48 hours prior to this peel procedure
- Sun protection should be used after this service
- Accutane: 1 year off
- Retin-A: Discontinue for 7-10 days prior to treatment
- Permanent Cosmetics: Wait 7 days then cover with occlusive barrier
- Immediately Post Lift or Facial Surgery: Needs doctor approval
- Rosacea: Will need to be evaluated
- Facial Waxing: Requires a 72-hour waiting period

#### **Cost/Profit Breakdown:**

50% Glycolic Acid Peel Cost: \$85

Amount Per Bottle: 4 fl. oz.

Estimated Services Per Bottle: 45

Average Amount Used Per Service: 0.09 fl. oz. (3 ml)

Average Cost Per Service: \$95-120

**Total Profit Per Bottle: \$4,275-5,400**

### What to Do:

1. **Cleanse and tone the skin thoroughly**, removing all makeup and debris. Perform a double cleanse, if necessary, and degrease with an AHA Toner. *We recommend Prosana Refining Mist.*
2. **Apply petroleum jelly** to the area under the lash line, around the nostrils, the vermillion border of the lips, and the corners of the mouth.
3. **Apply a thin coat**—0.09 fl. oz. (3 ml)—of 50% Glycolic Peel to the face and neck with a fan brush, beginning at the forehead and working down to the jaw line in short, even strokes.
4. **Leave on 2–4 minutes** and watch for redness. It's not necessary to layer this peel. A fan may be necessary.
5. **Neutralize the peel** - Apply Prosana Neutralizer using glycolic applicators or esthetic wipes. Cover the client's eyes and thoroughly saturate skin until the client feels no additional sensation. Rinse neutralizer with water for 30–60 seconds using a damp esthetic wipe. *Water alone may spike and trigger acids to further process.*
6. **To cool and comfort the skin**, apply a layer of Prosana Cooling Mask to the skin and allow to sit on the skin for 10 to 15 minutes before removal.
7. **Apply your preferred calming balm or serum.** *We recommend Prosana Calming Balm.*
8. **If it's daylight**, follow with a sun protectant product.
9. **Review client's homecare regimen** and make recommendations as appropriate.
