

## Usage Instructions

---

### **Product Name**

Ardell® DuraLash®

### **Procedure**

1. Put 2-3 drops of LashTite Adhesive onto a small piece of foil. Keep the bottle tightly capped to prevent spilling and to keep the adhesive from drying out.
2. Remove a DuraLash from the tray by gently grasping it with tweezers near the end.
3. Dip end of DuraLash into LashTite Adhesive. Do not fully coat the lash with adhesive. More adhesive does not mean better adhesion.
4. Starting at the outer corner of the eye, place a DuraLash on top of the natural lash with the end as close to the eyelid as possible without touching it.
5. Gradually apply DuraLashes, working towards the inner corner of the eye.

### **Methods**

For easy lash extensions, apply 10-15 DuraLashes per eye.

To use as accents, apply 3-5 DuraLashes on the outer corners only.

To fill gaps, apply only where needed.
