

## **Thermal Mylar Foil**

### **Benefits**

- ◆ Comfort: Ultra lightweight and flexible to use. Non-irritating to the most sensitive skin.
- ◆ Ultra reflective: High thermal insulation factor keeps client warmer during cool-down procedure.
- ◆ Hygienic: A single use material prevents the development of unhygienic conditions.
- ◆ High Visibility Product: Seen by your clients at the world's finest clinics and salons.

*The following steps are suggestions only. Your own specialized treatments should be continued.*

### **Procedure**

**STEP 1.** In a wet treatment room place *Thermal Mylar Foil Sheet* on treatment table over heating pad or blanket.

**STEP 2.** Apply therapeutic or beauty formulation to skin.

**STEP 3.** Wrap *Thermal Mylar Foil* and heating blanket around body.

**STEP 4.** Keep body wrapped for time required for each treatment (usually 10 - 20 min).

**STEP 5.** Unwrap client; remove treatment with a hot towel, dispose of *Thermal Mylar Foil* and mess.

### **Cool Down Process (if required)**

**STEP 6.** Wrap client in new *Thermal Mylar Foil* for cool down process. (High insulation of foil assists skin to continue absorbing nutrients from wrap).

**STEP 7.** Allow 20 minutes cool down period; use blanket if necessary to keep client warm.

**STEP 8.** Apply Post Therapy Lotion to full body.
