

Rose Wax

Usage:

1. Heat wax until it flows easily.
2. Stir for consistency.
3. Bath temperature should be medium to high.
4. Before waxing, use pre-wax spray to prepare larger areas.
5. Use tea tree oil for small areas and for increased numbing.
6. Apply a light coat of dusting powder to the area to be treated.
7. Apply wax in a thin layer in the direction of the hair growth.
8. Apply a strip of pellaon or muslin over the treatment area.
9. Rub strip in direction of hair growth to form a good bond.
10. Remove with a quick, close pull in the opposite direction of the hair growth and parallel to the body.
11. Soothe treatment area with tea tree oil.
