

Mehaz Professional Eyelash Curler

Directions:

1. Hold the curler handles with your middle finger and thumb.
2. Open the curler by spreading the handles and insert lashes between the top and bottom (silicone) section of the curler.
3. Gently squeeze handles to capture lashes close to the base of the lash. Hold gently but firmly for 10-20 seconds. Do not pull or tug. Release.
4. For a more pronounced curl, repeat the procedure closer to lash tip.

Caring for your implement:

Before and after use, clean the curler with alcohol. Store in a dry place. When both silicone pads wear out, you should replace the entire curler to prevent damage to lashes and eyes.
