

## Revitalizing Cream Peel (pH 3.6)

# Revitalizing Cream Peel (pH 3.6)

Sizes Available  
6oz

### Product Description:

Here is an elegant solution for skin that is sun damaged, thirsty and parched. A refreshing resurfacing cocktail blended with peptides, AHAs and collagen, Revitalizing Cream Peel diminishes dryness, thoroughly hydrates and increases moisture retention.

### Skin Types & Conditions:

All skin types. Targeted for hyperpigmented, overly dry or dull skin. DO NOT USE IF ALLERGIC TO ASPIRIN.

### Benefits:

- Smooths fine lines and wrinkles
- Refines skin texture
- Increases hydration
- Improves elasticity

**Usage:** After cleansing, apply a thin coat with a fan brush to face and neck. Avoid eye, nose, and mouth openings. Client may experience a mild tingle. Leave on 2-4 minutes. Remove completely with a wet towel or sponge. Patch test is recommended 24 to 48 hours prior to this peel procedure. Refer to *Control Corrective's* technical manual to complete instructions.

A series of 6 to 8 peels, performed every two weeks, will help strengthen, smooth and hydrate delicate or sensitive skin.

**Treatment Room:** Hydrating Cream Peel Facial, Revitalizing Cream Peel.

### Featured Actives:

**Lactic Acid (18%)** - Lactic Acid was discovered in Sweden in 1780 and has been used for years in cosmetic preparations. An alpha hydroxy acid derived from sour milk, lactic acid has better water intake than glycerin and studies report that lactic acid has the ability to increase the water-holding capacity of the corneum layer as well as improve the elasticity of the skin. Lactic acid is less irritating on sensitive or dry skin than some of the other AHA's. When compared with other water-binding agents, (Sorbitol, NAPCA, Glycerin), clinical tests show that lactic acid outperforms them all.

## Revitalizing Cream Peel (pH 3.6)

### Revitalizing Cream Peel (pH 3.6)

**Salicylic Acid (5%)** - Aids in dissolving the top layer of the stratum corneum by virtue of its keratolytic nature. Salicylic acid is a chemical derived from the bark of sweet birch and leaves of wintergreen. In the 5% concentration, it has the most impact with respect to exfoliation at home. Known for its antiseptic qualities as well, this ingredient is excellent for most skin types, except very dry or sensitive skin. The 5% concentration is much higher than the over-the-counter strengths that are typically much lower in strength – (in the neighborhood of .05% - often not strong enough to get the intended results).

**Acetyl Hexapeptide-3** - One of the newest innovations in cosmeceutical ingredient technology, this active ingredient, also referred to by its trade name, Argireline™, has been found to reduce the depth of wrinkles, especially in the forehead and around the eyes, as well as slowing down the development of wrinkling. Recent studies show that the facial wrinkling is reduced by inhibiting a formation of proteins in the skin that are responsible for provoking facial muscle contractions.

**Retinol** - A biologically active form of Vitamin A that can be converted to retinoic acid by the skin. Retinol's benefit stems from its vital role in skin growth, maintenance, and function. Soluble Collagen – Collagen is the main component of the skin's dermal matrix, the structure responsible for the strength, spring and thickness of youthful skin. Soluble Collagen aids in the progressive improvement of skin tone and resiliency.

**Carica Papaya Fruit Extract** - Beneficial for skin care and repair. Papaya contains Papain, which accelerates the formation of new cells while dissolving dead skin buildup. It also protects the external layers of the skin and builds capillary strength, Papaya reduces the signs of premature aging, giving the skin a smoothness and provides textural improvement.
