

Clear Med 5%

Sizes Available
2.5oz

Product Description:

Sulfur-enhanced benzoyl peroxide penetrates deeply to loosen pore-clogging debris and hardened oils while killing bacteria and soothing inflammation.

Skin Conditions:

For dry to normal skin with light to moderate acne.

Benefits:

A strong exfoliating gel that aids in reducing acne breakouts by exfoliating the intracellular cement that clogs the pores.

- Designed to kill acne bacteria below the surface of the skin
- Reduces inflammation
- Superior penetration

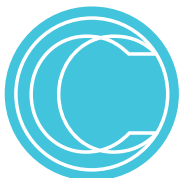

Usage: Always patch test a small area before first application. Apply sparingly to affected areas once or twice daily as needed. Dryness and light peeling may occur during the first few weeks of usage.

Treatment Room: n/a

Featured Actives:

Benzoyl Peroxide 5% - Forces peroxide into the sebaceous opening where it releases oxygen, thereby reducing the P. acne bacteria. Benzoyl peroxide also suppresses the level of irritating fatty acids in sebum and the level of skin infection.

Sulfur 3% - Reduces the inflammation associated with acne as it dissolves the skin's surface layer of dead cells. It also increases the potency of benzoyl peroxide, which also suppresses the level of irritating fatty acids in sebum and the level of skin infection.
