

Sensitive Skin Enzyme Mask

Sensitive Skin Enzyme Mask

Sizes Available
2oz, 8oz

Product Description:

Anti-inflammatory hydration provides instant relief for maximum suppleness as non-irritating exfoliators enable skin to take in and retain moisture more effectively.

Skin Conditions:

For sensitive or dehydrated skin.

Benefits:

- Smoothes and “polishes” the skin texture
- Hydrates and leaves skin feeling moisturized and calm

Usage: Apply liberally with fingers or a fan brush. Leave on 5-7 minutes then rinse off with water. May be used several times per week if desired to keep the skin glowing.

Treatment Room: Clarifying Enzyme Facial, Classic Nourishing Facial, Revitalizing Cream Peel Facial, Smoothing A.H.A. Body Peel.

Featured Actives:

Bentonite - An excellent, non-comedogenic clay that helps calm the skin.

Papaya - Derived from papaya fruit, this non-abrasive ingredient is specific to dead cell digestion. Therefore, the risk of irritation or burning sometimes associated with alpha hydroxy acids is minimized. Softens sebum when activated and steamed on the skin.

Safflower Oil - This botanical seed extract is known to be hydrating and is excellent carrier oil. Safflower oil is non-comedogenic.

Kaolin (China Clay) - This soft powder clay is a mixture of various aluminum silicates. It provides excellent coverage and has good absorption abilities for the oil and sweat secreted by the skin. It is easily removed by normal cleansing procedures and is considered a non-comedogenic ingredient.

Bromelain - Derived from pineapple, this enzyme also digests keratinized cells. It has been used in folkloric medicine as an anti-inflammatory agent and blends with the papain enzyme.

Titanium Dioxide - When titanium dioxide is applied to the skin, it scatters UV light, offering the skin UV protection. This non-chemical SPF reduces the risk of an allergic reaction often attributed to using chemical sunscreens.
