
Elastin and Collagen Eye Mask for All & Aging Skin

Description

Suitable for all skin types, the Elastin and Collagen Eye Mask contains vitamins, acids, and extracts to restore the skin's natural moisture and give firmness to the delicate muscles around the eye area. It helps to suppress fine lines, dark circles, and puffiness.

Skin Type: All skin types/aging skin.

Benefits:

- Helps:
 - Restore the skin's natural moisture.
 - Give firmness to the delicate muscles around the eye area.
 - Suppress fine lines, dark circles, and puffiness.

Ingredients

Aqua, Marine Elastin, Collagen, Aloe Vera, Amino Acid, Vitamins A, B, and C, Cucumber Extract, Gingko Extract, Horsetail Extract, Hyaluronic Acid, Liposomes, Methylparaben, Propylparaben

Aloe Vera	An emollient with hydrating, softening, healing, antimicrobial, and anti-inflammatory properties.
Amino Acid	Enhances water retention and skin moisturization.
Aqua	Water
Collagen	Great hydration potential. Can bind and retain many times its weight in water.
Cucumber Extract	From the fruit. Has moisture-binding, moisture-regulating, soothing, tightening, anti-itching, refreshing, softening, healing, and anti-inflammatory properties. Contains amino acids and organic acids that help strengthen the skin's acid mantle.
Gingko Extract	A beneficial anti-aging ingredient - has antioxidant properties. Also appears to help the production of collagen and elastin. Anti-inflammatory, may help improve a couperose condition due to its protective effect on vascular walls.
Horsetail Extract	Has stimulating, astringent, soothing, healing, and softening properties. Has the ability to increase the skin's defense mechanism, regulate the skin, and strengthen connective tissue. Can also help prevent wrinkles around the orbit of the eye.

Hyaluronic Acid	A substance that occurs naturally in the dermis. It is a natural moisturizer with excellent water-binding capabilities. When applied to the skin, it forms a film similar to the way it holds water in the intracellular matrix. The ability to hold water provides smoothness, improving the skin's appearance.
Liposomes	Small, double layered, hollow, spherical phospholipid membrane vesicles that can encapsulate water-soluble and oil-soluble substances. They can be accepted through cell membranes and metabolized by the skin. This allows them to deliver "actives" to the skin that could not be readily accepted otherwise.
Marine Elastin	Extracted from the connective tissues of fish. Contains peptides and amino-acids of elastin. Provides fibroblasts the amino acids and peptides they need to increase the synthesis of elastin. It also provides nutrition to the skin, reinforces cutaneous tonality and elasticity, promotes cutaneous strength, and helps reduce wrinkles.
Methylparaben	Preservative used to combat bacteria and molds.
Propylparaben	Frequently used preservative against bacteria and mold.
Vitamin A	Helps regulate keratin. Helps improve the skin's texture, firmness, and smoothness. Provides anti-aging benefits.
Vitamin B	Acts as a penetrating moisturizer. Appears to stimulate cellular proliferation and aid in tissue repair.
Vitamin C	A well known antioxidant that is popular in anti-aging products.

Usage Instructions

1. Thoroughly cleanse the face.
2. Apply the mask.
3. Leave on for 15 to 20 minutes.
4. Remove mask.
5. Apply appropriate toner and moisturizer.
