## 4-in-1 Full Face Collagen Crystal Mask

### Description

Suitable for all skin types, the 4-in-1 Full Face Collagen Crystal Mask is transparent and crystal clear in appearance. A complete and intensive four-fold facial care in a single mask, it whitens, moisturizes, minimizes pores, and replaces collagen.

This innovative transparent facial mask is composed mainly of pure natural collagen, extracts, and purified water that release whitening and moisturizing essences. Together with its unique texture composition and ingredients, it is also effective in tightening pores and replenishing lost collagen. It also gives the skin an immediate soft and moisturized appearance with elasticity.

The one-way absorption rate of this product is higher than 98% which means that the amount of nutrients and moisture it offers is 10 times more than that of ordinary facial masks. In only 10-20 minutes, the ingredients condensed on this crystal mask will gradually dissolve due to body temperature and will be absorbed directly into the skin cells, providing needed nutrients and moisture. During this process, the mask's thickness shrinks from 2 mm to 1 mm.

**Skin Type:** All skin types, especially hyperpigmented. Not recommended for acne conditions.

### Benefits:

- Whitening – Helps:
  - Optimize facial cell's metabolism
  - Speed up the elimination of melanin.
  - Inhibit the formation of skin pigment.
  - Suppress the activeness of tyrosinase.
  - Balance the distribution of melanocytes.
  - Improve skin conditions by reducing roughness, dullness, and paleness.
- Moisturizing – Helps:
  - Replenish moisture.
  - Enhance skin's ability to hold moisture.
  - Improve rough and dry conditions.
  - Give the skin an immediate soft and moisturized appearance with elasticity.
- Anti-Wrinkles – Helps:
  - Improve micro-circulation in the skin.
  - Increase nutrients.
  - Optimize skin's metabolism.
  - Prevent aging and wrinkles result from external pollution or lack of nutrients.

---

## Ingredients

Plant Collagen, NMF, Hyaluronic Acid, Rose Essential Oil, Arbutin, Mountain Lily, Vitamins C & E, Hydrolyzed Glycosaminoglycans, Colloidal Minerals, Sodium PCA, Purified Water & Rose Essential Oil.

Arbutin	Extracted from the bearberry plant, it is a skin lightening agent that inhibits tyrosinase and prevents the formation of melanin.
Colloidal Minerals	Colloidal minerals are groups of mineral molecules held together by special electrical properties dispersed or suspended in a liquid. When in colloidal form the minerals remain evenly dispersed in the water. Colloidal minerals are able to maintain their own identity while being suspended in water. Having a variety of forms of iron in the colloidal suspension will increase the absorption rate.
Hyaluronic Acid	A substance that occurs naturally in the dermis. It is a natural moisturizer with excellent water-binding capabilities. When applied to the skin, it forms a film similar to the way water is held in the intracellular matrix. The ability to hold water provides smoothness, improving the skin's appearance.
Hydrolyzed Glycosaminoglycans	Has hygroscopic (capable of absorbing moisture) properties. Its small molecular structure allows it to penetrate the outer epidermal layers.
Mountain Lily	Calms, soothes, and regenerates dry and inflamed skin. Helps skin maintain flexibility and discourages excessive build-up of dead skin cells.
NMF (Natural Moisturizing Factor)	Found in the corneum layer, NMF is made up of hygroscopic (capable of absorbing moisture), water soluble substances that regulate the layer's selective permeability. When included in skin-care products, they appear to help stabilize and maintain this complex intercellular-skin matrix. NMFs help keep the intercellular area of the skin intact. This helps prevent surface irritation from penetrating deeper into the skin, helps keep bacteria out, and aids the skin's immune/healing system. Using moisturizers that contain NMFs allows your skin to repair itself without the problems brought on when skin is suffering from dryness, environmental distress, or excess irritation.
Plant Collagen	Commonly used in skin care preparations. Using plant derived collagen can help restore the skin's elasticity and youthfulness, and can stimulate the production of the body's natural collagen. Tobacco leaves and hydrolyzed wheat are commonly used sources of plant collagen. After being harvested, they are altered to produce human-like collagen.
Purified Water	Water that is mechanically filter or processed so that it clean and free of any contaminants.
Rose Essential Oil	Has antiseptic, disinfectant, and soothing properties. Good for all skin types, especially mature, dry, or sensitive skin.

---

Sodium PCA	High performing humectant derived from amino acids. Found naturally in the skin.
Vitamin C	A well known antioxidant that is popular in anti-aging products. Its synergistic effect with vitamin E is excellent. As vitamin E reacts with a free radical, it is damaged. Vitamin C repairs the free-radical damage in vitamin E allowing it to continue scavenging free radicals.
Vitamin E	An important oil-soluble antioxidant and free-radical scavenger when applied topically. It is also has photoprotectant capabilities and helps protect the cellular membrane from free-radical damage. It also serves a preservative function due to its ability to protect against oxidation.

**Usage Instructions**

1. Thoroughly cleanse the face.
2. Open foil packet, remove the two sections of the transparent crystal face mask; unfold and place on the face.
3. Remove after 10-20 minutes.
4. Do not rinse or wash the face after use. Allow the remaining ingredients to absorb.
